

Advanced Energy Conference POSTER PRESENTERS

Chart the Course for Energy

The Advanced Energy Conference wants to highlight your work and connect you with energy professionals and entrepreneurs at our university poster session and online.

Abstracts are the basis for poster selection. Students whose abstracts are accepted can attend the poster session for free, participate in a networking reception and view conference exhibits. Only 100 abstracts will be accepted for onsite floor display. Check the conference website for updates.

We also invite students to submit a poster online to be displayed on the AEC event website. At this time, we are only providing free access to the poster session and network reception to students who register for onsite floor submissions

Submission ends on **August 19, 2022**. Students will be notified by email of acceptance and provided with further instructions by **August 22, 2022**. Visit aec2022.aertc.org or contact Adam Ortiz at Adam.Ortiz@stonybrook.edu for more information. Online registration coming soon.

Our conference will feature posters from students conducting research related to the topics listed below:

- Advanced Metering Infrastructure
- Advances in Solar Energy
- Artificial Intelligence for Energy
- Battery & Energy Storage
- Behavioral Energy Savings
- Biofuels
- Blockchain Technology
- Building Controls
- Building Envelope
- Carbon Reduction
- Cybersecurity for Energy
- Digital/Smart Utility
- Distribution Platforms
- Electric Vehicles/Transportation
- Electrification
- Heat Pump Technologies
- Integrated Grid
- Large-Scale Renewable Energy
- Natural Gas Technologies
- Offshore Wind Energy
- Onshore Wind Energy
- Regulation & Policy
- Renewable Natural Gas
- Smart Cities
- Social Engagement
