Dear Colleagues,

As you know we have been teaching in the power group online courses for the last 14 years and in the last year and this year I am teaching ECE 390 part in-class and part online lectures. We use Adobe Connect (https://helpx.adobe.com/adobe-connect/connect-downloads-updates.html) with the online room in learn.

I have prepared two files to show you how to use this online service on learn. The lectures are taught live, and the instructor can easily use power point slides, lecture notes, white board for explaining material during the lecture, by simply using [Alt+Tab] to move from one modality to the other. Students can ask questions during the lectures and the instructor can reply, all these activities are transparent to all students. The lecture can also be recorded and archived for future display.

There are a lot of emails going around now about the online delivery and I did not want to add to this confusion by sending this email to everyone in the department. However, I thought to share my experience in the online teaching and send this material to you and if you find a value in it please feel free to share it with the rest of the department.

Regards

Magdy
