Turnitin® Guidelines for Instructors

What is Turnitin®?

Turnitin® is a text-matching tool that is commonly used to help detect plagiarism, but it can be integrated into course activities as an educational tool to help students practice proper scholarly writing skills.

Check

Turnitin® compares submitted documents to its database and sources on the web.

Add

Submitted files are housed on the Turnitin® server, which is based in the U.S., and on our local LEARN server.

Report

For each submission, a similarity report is generated which provides information about matched text.

Should I use Turnitin®?

I’m looking for a scholarly writing tool.
Student and instructor sees similarity report for student submission.

Draft submissions’ similarity report helps students implement proper scholarly writing skills for final submission.

I’m looking for a text-matching only tool.
Only the instructor sees similarity report for student submission.

Single submission does not allow students to make revisions based on the similarity report.

Considerations and Limitations

Does not verify authorship

May require extra marking time

May not work for graphs, images, or tables

For privacy and security reasons, must provide alternate assignment, e.g. scaffolded/annotated

Preparing Students for Turnitin®

Provide rationale for Turnitin® use

Discuss discipline-specific citation conventions

Introduce the concept of original thought

Clearly define plagiarism within the context of your discipline

Discuss academic integrity and provide resources

Chicago MLA

Turnitin®

Alternate
Implementing Turnitin®

Enable Turnitin® in the Turnitin® tab of the dropbox folder.

To use Turnitin® as a scholarly writing tool, create a 'draft' dropbox and a 'final submission' dropbox. Enable Turnitin® in both dropbox folders. In the 'draft' folder, select ‘Allow students to view Similarity Reports’ under ‘More options in Turnitin®’.

Interpreting Turnitin® Reports

Check
Check Similarity Report for percentage of common phrases.

Review and Assess
Review and assess the highlighted text within the document for originality and proper citation.

Grade
Grade assignment as usual.

The following statement must appear in every course outline:

**Turnitin.com**: Text matching software (Turnitin®) may be used to screen assignments in this course. Turnitin® is used to verify that all materials and sources in assignments are documented. Students’ submissions are stored on a U.S. server, therefore students must be given an alternative (e.g., scaffolded assignment or annotated bibliography), if they are concerned about their privacy and/or security. Students will be given due notice, in the first week of the term and/or at the time assignment details are provided, about arrangements and alternatives for the use of Turnitin® in this course.

It is the responsibility of the student to notify the instructor if they, in the first week of term or at the time assignment details are provided, wish to submit the alternate assignment.

**Similarity Index**
A percentage representing the number of words found in common with database content, divided by the total number of words in the file.

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Colour</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;0%</td>
<td>Blue</td>
</tr>
<tr>
<td>1% to 24%</td>
<td>Green</td>
</tr>
<tr>
<td>25% to 49%</td>
<td>Yellow</td>
</tr>
<tr>
<td>50% to 74%</td>
<td>Orange</td>
</tr>
<tr>
<td>75% to 100%</td>
<td>Red</td>
</tr>
</tbody>
</table>

Note: There is no “safe” colour or percentage: no percentage or colour in similarity report can fully evaluate whether text has been plagiarized.
