Theodora Vardouli

Assist. Professor, McGill University

Theodora Vardouli is an Assistant Professor at the Peter Guo-hua Fu School of Architecture, McGill University. She researches histories and contemporary practices of computational design in their technical and cultural dimensions. She is also in the process of establishing the Computational Design Exploratory (CoDEx), a research lab that expands scholarly research on this area through critical design and making of artifacts, code, and machines.

Oliver Schneider

Assist. Professor, University of Waterloo

Oliver Schneider is an Assistant professor, human-computer interaction researcher, and haptician at the University of Waterloo. Haptic technology engages the sense of touch for a user, providing physical feedback in computing. Oliver and his lab are currently working on developing a set of computing tools for the creation, deployment, and study of haptic technology.

Jonathan Enns

Assist. Professor, University of Waterloo

Jonathan is an Assistant Professor at the University of Waterloo School of Architecture. His work mainly focuses on human centered design in architecture and spatial innovation. He also operates Humanics Lab, a collective which is involved in the development of design research and experimental prototyping.
