

### **Arch 684 Roma Tre Workshop March 2010**

The collaboration between mixed teams of Roma Tre and Waterloo Masters Students will examine a recent piece of redundant Roman infrastructure, namely the Tangenziale or Tiburtina Highway constructed in the 1960's to link major traffic routes across an enormous rail corridor. The teams will visit and analyze the site and make a series of speculative proposals for its creative appropriation. (Please see attached site documentation).

The time frame is brief. The Waterloo Trastevere Masters studio will provide work-space for teams to develop their projects over the course of four days with reviews taking place starting at 10am Saturday March 20 at Roma Tre's Facoltà di Via Madonna dei Monti, aula Attavanti.

#### **Review Panel**

Prof. Francesco Cellini, Coordinatore del Master

Prof. Mario Manieri Elia, Direttore del Master

Prof. Maya Segarra Lagunes, Coordinatore del Master

Prof. Ryszard Sliwka, Co-ordinator Waterloo Graduate Programme in Rome

Prof Lorenzo Pignatti, Co-ordinator Waterloo Undergraduate Programme in Rome
