WATERLOO PHOTOS
STORE, SORT, AND SHARE DIGITAL ASSETS

4/18/18

Presented by: Natasha Jennings
Information Systems & Technology
WHAT IS WATERLOO PHOTOS?

- A browser-based Digital Asset Management (DAM) system that's been configured to support the needs of the University of Waterloo with respect to storing, sorting and sharing digital assets, specifically image files.

- Vendor is Asset Bank (UK).
FEATURES AND FUNCTIONALITY

- LDAP integration (i.e. use WatIAM credentials)
- Ability to create organizational units with group admin permissions
- Configure permissions unique to your organizational unit
- Easily add members to groups and define permissions (via security group at this time)
- Excellent in-page support
**BENEFITS**

- A centralized, browser-based solution that provides convenient, anywhere access for users.
- Securely upload and share your photos with members of your team, other Waterloo Photos users, or with partners external to the University of Waterloo.
- Configure permissions unique to your organizational unit; quickly search for and locate the photos you need; and crop, resize, or reformat assets before downloading.
BENEFITS

- The robust reporting tool to allows you to easily monitor photo usage and help maintain your repository of assets.

- Whether you’re a team of one or 25, Waterloo Photos offers a reliable, immediate solution for photo storage and content sharing and promotion.
By the numbers
