BIOMATERIAL AND BIOMANUFACTURING Academic-Industry Forum

Tuesday January 19, 2016

Waterloo technologies are revolutionizing the development of biomaterials and biomanufacturing processes, contributing to innovative solutions across health, medicine, pharmaceuticals, agriculture, food, water, environment, energy, cleantech, manufacturing, construction, software and more.

Join us to discover some of the amazing science and engineering underlying innovations in biomaterials and biomanufacturing and for the opportunity to network and explore collaboration opportunities.

<u>AGENDA</u>

- 2:30 Welcome & Opening Remarks
- 2:40 Researcher and Company Presentations
- 3:40 NSERC and OCE Partnership Programs
- 3:55 Closing Remarks
- 4:00 Networking Reception
- 5:30 Close

RSVP required by January 8, 2016.

Evelyn Allen, Office of Research, University of Waterloo evelyn.allen@uwaterloo.ca

Supported by <u>Ontario Centres of Excellence</u> (OCE), <u>Natural Science & Engineering Research Council of Canada</u> (NSERC), <u>Waterloo Institute for Nanotechnology</u> (WIN), the <u>Centre for Bioengineering and Biotechnology</u> (CBB), and the <u>University of Waterloo</u>

<u>Registration is required</u> for this FREE event via **<u>EventBrite</u>** as seating is limited.
