Need to haves
> Medium or large frying pan, medium size pot with lid, and a larger pot for pasta
> Can opener
> Baking sheet, pizza pan, and two oven mitts
> Oven proof casserole dish
> Toaster
> Mixing bowls and mixing spoon
> Measuring cups and spoons
> Spatula or flipper
> Vegetable peeler and cheese grater
> Ladle, potato masher, wire wisk
> Colander
> Cutting board and 3 sharp knives (paring, serrated, chef’s knife)

Nice to haves
> Garlic press
> Blender or Magic Bullet
> Personal size grill (Ex. George Foreman etc.)
> Slow cooker
> Rice cooker
> Microwave oven
> Salad spinner to dry lettuce and greens
> A second cutting board to use for raw meat
> Muffin tins
> Loaf pan
> Kettle

How to plan healthy meals

Juggling the demands of school, social life, jobs, volunteer work, etc.? Planning ahead will make it easier to eat healthy meals while also saving you money and time. The few minutes it takes to plan your meals for the coming week are well worth the effort. Keeping your kitchen stocked with the basics will make it easy to prepare a quick, energy-packed meal. Meal planning is easy when you follow the simple steps below.

1. **Open your cupboards, refrigerator and freezer.** Decide what needs to be used up soon then look for recipes that use those ingredients.

2. **Check the online flyer at the supermarket.**
   Buying seasonal fruits and vegetables and sale foods helps to lower your grocery bill.

3. **Look online if you need ideas.** Check the box for some places to start. Write down the shopping list for each recipe if you don’t have the ingredients on hand.

4. **Use Canada’s Food Guide to find out how much food you need to eat from the four food groups each day.** In general, meals should include veggies and/or fruit, grains, a lower fat milk product or alternative and a meat or protein-rich alternative. Most snacks should include foods from 2 Food Guide food groups.

5. **Write out a menu plan for the week.**
   Each day should include 3 meals and 1 to 3 healthy snacks. Keep in a visible spot like on the fridge.

6. **Make a shopping list to take with you.**
   Shopping is easier and faster if you list things together according to where they are found in the store (produce, frozen food, etc.).

Healthy eating goals

- Serve vegetables and/or fruit with each meal and eat these often as a snack.
- Include an orange and a darkgreen veggie daily.
- Use more whole grain choiceslike brown rice, oats and quinoa. Buy 100% wholegrain pasta, breads, cereals, crackers and tortillas.
- Limit added fat, salt, sugar.
- Use fewer packaged, ready-to-eat and take-out foods.
- Buy lower-fat dairy products with 2% fat or less.
- Eat fish at least twice a week.
- Look for lean, unseasoned meat and take the skin off chicken.
- Choose oils such as canola, olive, low fat-mayonnaise and margarines low in saturated and trans fats.
- Limit less nutritious foods and drinks like candy, chips and pop and watch your portions.
- Drink more water.

Money savers

- Grains such as rice, pasta and barley are inexpensive and can be used in soups, stews and salads.
- Eat more meatless meals. Legumes like beans, chick peas or lentils, eggs, tofu, peanut butter and canned fish contain a lot of protein at a lower cost per serving than meat, fish or poultry.
- Look for seasonal recipes; veggies and fruit are cheaper and taste better when they’re in season.
- Re-invent your leftovers by using in soups, sandwiches, omelettes or casseroles.
- Buy spices and foods you only need in small quantities in the the bulk section.

Timesavers

- Cook extra. It doesn’t take much longer to make a larger pot of spaghetti sauce, soup or stir-fry.
- Portion leftovers and freeze in individual servings to use when you’re really busy.
- Cut up raw veggies for snacks or prepare salad for 3 or 4 days at a time.
- Use frozen fruit in smoothies or on yogurt.
- Use frozen vegetables.
- Invest in a slow cooker.
- Clean up as you go.
The shopping trip

When you keep your kitchen stocked with healthy food, you’re more likely to eat better, so shop for groceries regularly. Before you go, have your menu planned and shopping list written out. One more thing: don’t shop with an empty stomach!

Good to know...

- Most of the foods recommended in Canada’s Food Guide - produce, bread, dairy products, meat, eggs, etc. - are found in the outside aisles of the grocery store. Spend more time here.
- Feature displays are there so you will spend more. Avoid impulse buys: stick to your list!
- The unit pricing sticker on the shelf allows you to compare the unit price of different brands or sizes of foods to figure out which costs less.
- While larger packages usually cost less “per unit,” only buy them if you will use up the food.
- Generic or store brands are often similar in quality to name brands but cost less.
- Most local supermarkets have a student discount day if you show your WatCard.

Read the ingredient list: 5 easy steps

The ingredient list always appears on the food label unless it contains only one ingredient. The ingredients are listed by weight from most to least. People with food allergies should always read the ingredient list.

1. Serving size
   Compare the serving size on the package to the amount you eat.

2. Calories, protein, fat, etc.
   This tells you how much energy and other nutrients you get from 1 serving.

3. % Daily Value
   This tells you if there is a little or a lot of a nutrient based on how much an average person needs in a day.

4. Choose foods with less of these:
   Fat, saturated and trans fats, cholesterol, sodium & sugar

5. Choose foods with more of these:
   Fibre, vitamins A & C, calcium, iron

Keep your food safe

Eating Well

If you have ever been sick with nausea, vomiting, fever, cramps or diarrhea, you may have been one of the many Canadians who get sick from food poisoning every year. Following these simple rules will help you to lower your risk of getting sick.

• Wash your hands. Use soap and warm water and wash for 20 seconds before preparing food and after handling raw meat, fish or poultry.

• Keep everything clean. Use hot, soapy water to wash preparation surfaces and cooking utensils. Change dish cloths and towels often and air dry. Wash fresh produce, even those that you peel, in cool, running water before using.

• Be careful with raw meat, poultry and fish. Use a separate cutting board when preparing these foods and don’t let their juices touch cooked foods or raw fruits and vegetables.

• Store your food properly. Keep eggs, dairy products, meats, fruit, vegetables, sauces, salad dressings and other foods that can spoil in the fridge or freezer.

• Thaw foods safely. Always thaw meat, fish or poultry on a tray on the bottom shelf of the fridge or use the defrost setting in the microwave. Cook defrosted foods soon after thawing.

• Cook food thoroughly. Ground meats and chicken should always be cooked to well done. When raw or under-cooked, they may contain bacteria that can make you sick, or worse...

Use a meat thermometer to check the temperature of cooked meat and leftovers (74 oC or 165 o F).

• Refrigerate leftovers promptly. Put leftovers in shallow containers for quick cooling and refrigerate right away. Don’t eat cooked food or dairy products that have been left out for more than 2 hours. When in doubt, throw it out!
What can I do with leftovers?

Nobody likes to waste money. Here are ten ideas for using food up.

1. Use overripe fruit like peaches or mangoes in a smoothie or crumble-topped fruit crisp. Ripe bananas you can’t use up can be peeled, sliced and frozen. Use in banana bread or smoothies.

2. Keep a container in the freezer for leftover cooked veggies and their cooking liquids until you have enough to make vegetable soup.

3. Add leftover cooked veggies or small pieces of leftover cheese to scrambled eggs or omelettes.

4. Simmer the leftovers (including bones) from a rotisserie chicken in water with celery, onion and carrot to make a flavorful chicken soup stock.

5. Make a cold salad with leftover cooked pasta by adding Italian or vinaigrette dressing and diced raw veggies like tomato, peppers, broccoli, etc. For more protein, add chickpeas, tuna or a hard boiled egg.

6. Bruised or soft apples can be made into applesauce by peeling, cutting into pieces and simmering in a saucepan with a small amount of water. When tender, mash with a fork or potato masher and season to taste with a little white or brown sugar and cinnamon. Don’t add the sugar until the end or apples won’t turn into sauce.

7. Turn leftover rice into a tasty new meal of fried rice by heating a little oil in a frying pan or wok. Add garlic, green onion, soy sauce, a lightly beaten egg or handful of slivered almonds, leftover rice, and whatever leftover or frozen veggies you have on hand. Heat, stirring occasionally for 4 or 5 minutes until the eggs are cooked.

8. Bread that you can’t use up the before the expiry date should be stored in the freezer. Leftover bread, rolls or similar baked products will dry out and become stale much faster than when stored at room temperature in or in the freezer.

9. Bags of milk can be frozen for up to 3 weeks. Thaw it in the fridge for a full day and when thawed, shake the bag well to redistribute the protein, which settles out in the freezing process.

10. Leftover chicken or beans can be made into a quesadilla. Mix with a little salsa, diced green pepper and shredded cheese; place on one half of a medium tortilla, fold and toast on both sides in an ungreased frying pan until lightly browned.
Basic cooking terms

Here are some common cooking terms and what they mean.

- Bake - to cook in an oven
- Beat - to quickly mix ingredients in a circular motion using a spoon, fork, whisk or electric mixer
- Blend - to gently mix ingredients together
- Boil - to heat a food so that the liquid gets hot enough for bubbles to rise
- Broil - to cook under direct heat
- Brown - to cook over medium or high heat until surface of food darkens
- Chop - to cut into small pieces of similar size
- Dice - to cut into very small cubes
- Drain - to remove all the liquid using a colander, strainer, or by pressing a plate against the food while tilting the container
- Fry - to cook food in oil or other fat (be careful of hot oil as it can cause burns and fires!)
- Grate or Shred - to scrape food against the holes of a grater in order to make thin pieces
- Grease - to lightly coat with oil, butter, margarine, or non-stick spray so food does not stick
- Julienne - to cut vegetables into long, fine strips
- Knead - to press, fold and stretch dough until it is smooth, usually using the heels of the hands
- Marinate - to soak food in a seasoned liquid to add flavor or tenderize meat (the liquid is a “marinade”)
- Mash - to squash food with a fork or masher until it isn’t lumpy
- Mince - to cut into very small pieces, smaller than chopped or diced pieces
- Mix - to stir ingredients together with a spoon, fork, or electric mixer until well combined
- Pare - to peel the skin from a vegetable or fruit
- Poach - to gently cooking food (such as eggs or fish) in water that is not quite boiling
- Preheat - to turn oven on ahead of time so that it is at the right temperature when you start baking (usually takes about 5 to 10 minutes)
- Sauté - to cook quickly in a little oil, butter, or margarine
- Simmer - to cook in liquid over low heat so that bubbles just begin to break the surface
- Steam - to cook food over steam without putting the food directly in water (usually done with a steamer)
- Stir Fry - to quickly cook small pieces of food over high heat while constantly stirring the food until it is crisply tender (often done in a wok)

Do I have to follow a recipe exactly?

It depends on what you’re making. The first time through, follow it exactly. The next time you make the recipe you can make adjustments in seasonings (i.e. nutmeg instead of cinnamon) or substitute a similar ingredient for another (i.e. whole wheat flour instead of white flour).

Baking, however, is a lot like a chemistry lab - with better tasting results! Baked goods such as bread, muffins and cookies depend on chemical reactions so the steps and ingredient amounts should be followed closely for best results.

*About salad greens*
Darker leafy greens like spinach, kale, arugula and mesclun (a salad mix of assorted young, brightly coloured salad leaves) contain much more vitamin A and other nutrients than iceberg lettuce. Pre-washed, ready to serve greens are more convenient but they also cost more.

*About salad dressings*
Bottled dressings save time, but they are also higher in sodium and more expensive than making your own.
Hearty Minestrone

Make a meal out of this traditional, hearty Italian soup by adding crusty whole grain bread and a salad. You can add whatever seasonal vegetables you have on hand. For a vegetarian version, omit the ground beef or substitute veggie “ground beef” or VP, texturized vegetable protein. This makes a large pot but you can freeze some to use later.

Prep time: 15 minutes  Cook time: 45 minutes

1 Cook beef or veggie ground round in a large pot (if using veggie variety add a little oil to the pot first) until brown.

2 Drain any fat, then add onion, carrot, celery, garlic, salt and pepper. Cook until veggies start to soften, about 5 minutes.

3 Stir in tomatoes and their juice, broth and water. Bring to a boil then reduce heat to low and simmer for 10 minutes.

4 Add the zucchini, potato, pasta and beans. Cover and simmer for another 20 minutes or until the pasta is cooked.

- 284 ml / 10 oz Beef or vegetable broth
- 500 ml / 2 cups Water
- 1 Small zucchini chopped
- 1 Medium potato, cut into small cubes (skin on)
- 125 ml Small pasta
- 250 ml / 1 cup Canned white kidney beans

Do you eat too fast?

It takes about 20 minutes for your stomach to let your brain know that you’re full. When you eat quickly it’s easy to overeat. So relax, eat slowly and enjoy your delicious creations!

### A note about cheese

Cheese is packed with calcium and protein, but it also contains a lot of fat. When you use a more strongly flavoured cheese in a recipe you can use less with the same great taste.

Chana Masala

This is a flavorful south Asian main dish made of spices and chickpeas, an inexpensive source of protein, iron and fiber. Using a prepared curry paste, which you can find in the international section of the grocery store, is a quick alternative to buying the spices individually. Indian curry paste comes in many varieties, but if you are less adventurous, stick with the mild variety. Serve along with a salad or steamed spinach and basmati rice or naan.

Prep time: 10 minutes  Cook time: 15 - 20 minutes

1 In large frying pan, heat oil on medium high heat and sauté onions lightly browned.

2 Reduce heat to medium and stir in garlic, curry, and tomato paste or diced tomato. Stir and simmer about 2 minutes.

3 Add chick peas, reserved liquid, lemon juice, salt and pepper and simmer 5-6 minutes, stirring occasionally.

4 Add margarine or butter, stirring through to melt it. Stir and simmer for 5 minutes more or until chickpeas are softened and dish is hot.

Ingredients | Makes 4 servings

- 30 ml / 2 tbsp Canola or other vegetable oil
- 1 Medium onion, chopped
- 1 Large clove of garlic, crushed or minced
- 15 ml / 1 tbsp Indian curry paste
- 1 Large diced tomato
- 1 can Chickpeas, drained and rinsed, reserving 45 ml / 3 tbsp of the liquid
- 15 ml / 1 tbsp Lemon juice
- 2.5 ml / 1/2 tsp Salt and pepper to taste

So Simple Hummus
This inexpensive spread is a source of both fibre and protein. It costs less to make your own than to buy it but you’ll need a small blender (or Magic Bullet), a hand blender, a food processor or a potato masher in order to make it smooth. Tahini is ground sesame seed paste and is what gives hummus its characteristic flavour. You usually find it in the international aisle of the supermarket. You can also substitute olive oil or peanut butter. Serve hummus with raw veggies or whole grain flatbread or crackers.

Prep time: 10 minutes  Cook time: None

Put all ingredients in blender and blend until smooth, adding a little more water if needed. If you use a potato masher the hummus won’t be as creamy but it will still taste great.

Apple Crisp

This easy but nutritious dessert can also be made with peaches, pears, blueberries or other fruit. Look for seasonal, local fruit at the UW Farm Market in the fall. Frozen fruit works in this recipe (don’t thaw it all the way) but stir in 15 ml/1 tbsp cornstarch into the fruit so it’s not too runny. Delicious warm or cold.

**Prep time:** 20 minutes  **Cook time:** 45 minutes

1. Preheat oven to 350F. Lightly grease an 8 x 8 inch baking pan or casserole dish or spray with non-stick spray.

2. Mix sugar with cinnamon in a mixing bowl (if using frozen fruit or berries also add 15 ml/1 tbsp cornstarch). Add apples and toss to mix.

3. Pour apple mixture into prepared pan.

4. For the topping, add the flour, oatmeal and brown sugar to the mixing bowl. Add the butter or margarine and use 2 knives to cut it into the mixture until it resembles small crumbs.

5. Bake until fruit is tender (check it with a fork) and the crisp is bubbling and browned, about 45 minutes (the time depends on the fruit you are using).

**Ingredients | Makes 9 servings**

- 1000 ml / 4 cups Peeled, sliced apples
- 30 ml / 2 tbsp Sugar
- 5 ml / 1 tsp Cinnamon

**Topping:**

- 125 ml / 1/2 cup Whole wheat flour
- 125 ml / 1/2 cup Oatmeal (not instant)
