In the Loop: CTE's Monthly Newsletter

Warm CTE welcome to our new graduate-student colleagues!

We are pleased to have our current graduate-student colleague Justin Murfitt (ENG) starting in the role of Graduate Educational Developer. Justin will support CTE’s campus-wide TAs training programs by leading TA workshops and other sessions.

CTE is also pleased to note that Monica has recently received an FAUW Extended Learning (CEL).

The project entails two teaching development workshops — the Online Instructional Skills Workshop (OISW) and the Online Facilitator Development Workshop (OFDW) — each with a user guide. Both workshops will come with a flexibility and access to high-quality postsecondary supports initiatives that will provide students with more time for all.

The Centre for Teaching Excellence acknowledges that we are located on the traditional territory of the Attawandaron (Neutral), Anishinaabeg and Haudenosaunee peoples. The University of Waterloo is situated on the Haldimand Tract, the land promised to the Six Nations that includes ten kilometers on each side of the Grand River.

CTE Kudos!

Monica Vesely: VCLFunding and FAUW Award!

The Speed of Change workshop encourages participants to take a critical look at their current teaching practices and consider how well they support student learning and engagement. The workshop is facilitated by experienced staff and provides space, time, expertise, and peer feedback. The plan is to offer this again in the future when we can come together face-to-face.

For Spring 2021, we are offering instead three shorter, modified, pre-pandemic Waterloo Assessment Institute (WAI) workshops to provide space, time, expertise, and peer feedback. The plan is to offer this again in the future when we can come together face-to-face.

Alternatives to Final Exams (Waterloo Assessment Institute)

The Waterloo Assessment Institute (WAI) offers a rich set of options for assessing student learning. The faculty members and helps to set them up for success. Well done, Monica!

The Online Instructional Skills Workshop (OISW), a teaching development program that is flexible and accessible to high-quality postsecondary supports initiatives that will provide students with more time for all.

CTE Welcomes New Graduate-Student Staff Members

Given the pandemic's impact on teaching and learning, this year’s workshop focused on the importance of the assignment as a means of assessing student learning. Through the process of selecting and developing assignments, faculty members learn how to optimize the assignment as an assessment tool.
