Bandida is in prison, and as a team you can decide whether you want to play to keep her in or get her out! In Bandida, you will work together to strategically place path cards. But watch out, some path cards have special actions on them that can dramatically affect game play! Players will either win together or lose together! For an extra challenge, flip over Bandida's card and use the side with 6 open pathways. (Note that this game will need a bit of a bigger surface to play as the tunnels can get long!)
