

Quick Start Instructions

Connect 4 (2 players)

Setup:

- Attach one blue leg to each side of the grid and place the grid where both players can reach.
 - Make sure the lever (found at the bottom of the grid) is closed so that the checkers do not fall through.
- Each player takes all 21 checkers of one colour.

How to Play:

- Your goal is to make a line of 4 of the same checkers in a row.
- Players take turns dropping one of their checkers into the grid.

Game End:

- The first player to get four checkers in a row of the same colour, wins!
- Move the lever to clear the grid. This will drop all the checkers so that you can play again!
