strategies 4+ goals/
strategies

Jaipur is a card game where two traders compete to become the Maharaja's personal merchant. In Jaipur, you will collect and trade goods at the market, then exchange them for tokens while trying to time your sales for maximum profit. But watch out, because waiting too long can cost you valuable points if your opponent sells first or the goods in the market shift. Score points by selling sets of goods, earning bonuses, and controlling the camel majority. After each round, the player with the most points gets the Seal of Excellence. The first player to collect two Seals of Excellence wins the game!
