strategies

Build territories to expand your kingdom of dominoes! In Kingdomino, you will pick from 4 new dominoes on each turn and try to build connecting and matching terrains in your kingdom in a 5x5 grid. The order of who picks first on each turn depends on which tiles were chosen the round before – if you picked the least valuable tile before, you'll pick first the next time. Try to get dominoes with crowns that can multiply the value of your terrain squares. Earn further points by ending up with a 5 x 5 square with your castle in the middle! The player who builds the territory with the most points wins the game!
