

Quick Start Instructions

Lemonade Shake Up! (2-4 players) (a co-operative game where you work together!)

1. Place the **customer cards** face-up in 4 rows made up of 3 cards each (like in the picture). Place the dice in the cup.
2. Shake the cup and roll the dice. Based on the dice you rolled, decide together which **recipe** you want to make (For example, which one do you have the most ingredients for already?). Move the dice “ingredients” you want to keep onto the card and put the rest back in the cup. (Unless you were lucky and completed a whole recipe in one roll- then jump to step 4).
3. Reroll the remaining dice again to see if you can get the remaining ingredients. You can roll a total of 3 times. You can reroll all the dice or only some of them.
4. **Did you complete the recipe?** Flip that recipe card over. On the other side you will see a **number of quarters** that you’ve received from your customer! Put this number of quarters on the money jar.
5. **Oops! Didn’t complete the recipe in 3 rolls?** Place a **sour lemon** token on any customer that is waiting to be served. This customer can’t be served anymore!
6. **Want to get rid of a sour lemon?** On your turn you can try once to roll three sugars and then take away one sour lemon. But if you don’t roll three sugars, you have to put another sour lemon token on any customer!
7. If you fill your money jar with **12 quarters** before you get 4 sour lemons, you all win! If you get **4 sour lemons** before the money jar is filled up, you will have to try again!
