

Quick Tips (use along with the original instructions)

My Lil' Everdell (2-4 players)

Setup:

- Place the board in the center of the play area and the **moon token** above the 1st round spot. Sort the **Resin**, **Twigs**, and **Berries** into Crates and place them on the board.
- Put the **Point Tokens** into a separate crate near the board.
- Put a **Resource Die** (1 per player) onto a dice spot, returning any unused dice.
- Shuffle the **Main Deck of Cards**. Deal 8 cards face-up below the board. The different card types such as critters and locations are outlined in the Instructions (p. 11).
- **Sort the 4 types of Parade Tokens** by type, ordering them 3 points (bottom), 4, 5 and so 6 points (at top). Place these 4 stacks along the path of the board.
- Each player takes a **Home Board** and a set of **3 matching Friends** (e.g., foxes, mice).
- Want a simpler version? There's a different setup (p. 4).

How to Play:

- Choose which player goes first and give them the **sun token**.
- Each game consists of **4 rounds**. During each round, complete the following 5 things:
 - 1. Roll dice**
 - The player with the sun token rolls all the Resource Dice, and places them back on the board (1 die per location).
 - 2. Gather Goodies**
 - Each player can activate all the **Green** cards they have beside their home boards.
 - You won't have any **Green** cards in the 1st round (unless playing simpler version).
 - 3. Take Turns (until all players have taken 3 turns)**
 - Starting with the player who has the **Sun Token**, take turns in clockwise order to place **1 Friend** onto a location on the board to perform that action.
 - Only 1 Friend is allowed on the **special Resource Dice spaces**.
 - You may place 1 Friend on a **red** card that you own and have played.
 - After you've placed a friend, you may **purchase 1** of the cards below the board and play it. Next, you may take the top **Parade Token** if you qualify for it (p. 11).
 - Continue until each player has taken 3 turns.
 - 4. Return Home**
 - Return all **3 Friends** to each player's home board.
 - 5. Move the Sun and Moon Tokens**
 - Pass the **Sun Token** to the next player on right. Move the **Moon Token** to next spot.

Game End and Scoring:

- Trade in any leftover resources you have to the Supply Creates with **Point Tokens**.
- Take **bonus points** if described at the bottom of any of your **Purple** cards.
- Count all the points on your **cards**, your **Parade Tokens**, and your **Point Tokens**.
The player with the most points wins!
