

Quick Start Instructions

Natural Science Bingo (2-6 players)

How to play:

1. Place **all the tiles** in a drawstring bag.
2. Give each player **1 game board**.
3. **Take turns picking a tile out of the bag**, naming the image, and showing the card to the other players.
4. Everyone checks their boards.
 - a. If the tile **matches** a square on your board, place it on the matching square on the board.
 - b. If the tile **does not match** anyone's board, discard it.
5. The first one to find all their 8 matching tiles, or whoever gets the closest if the time to play ends, **says BINGO!** and wins!
6. If you want to learn more about the images, there's lot of information on the back of the card!
