

Quick Start Instructions

No Thanks! (3-7 players)

Setup:

- This Quick Start Instruction will describe playing a single round – but players are encouraged to play multiple!
- Note that it will be the player with the **lowest** score that wins. Each card is worth its face value in points. If you have cards in a sequence, then those cards are worth only the lowest value.
- Shuffle the cards. Count out **9 cards and return them to the box**. Do not look at these cards.
- Place the remaining cards face down, in the center of the play area. This is the **draw pile**. Flip over the top card and place it beside the draw pile, this is the **active card**.
- Give each player **11 Pass Tokens** (If 6 players, 9 Pass tokens each; 7 players, 7 tokens). Keep them hidden in your hand.

How to Play:

- Decide who goes first. **On a turn, you can do 1 of these 2 things:**
 1. **Place a Pass Token** on the active card, the turn then passes to the player on the left.
 - If you have no Pass tokens, then you cannot pass.
 2. **Take the active card** and place it face up in front you. Take any Pass Tokens on the card and add them to your hidden supply.
 - Turn over a new active card from the draw pile. Your turn continues with the new card.
- When placing cards in front of you, it is recommended that you try to keep the cards in sequence (see Game End and Scoring).

Game End and Scoring:

- The game ends when there are no more cards in the draw pile.
- Count up the face value of cards in points, but remember that only the lowest card in a sequence counts. Lowest score wins!
