

## Quick Start Instructions

# Snails' Pace (2–6 players)

How to play as a team (co-operative version):

1. Take out the board, 2 dice, and place all 6 snails at the start line.
2. Let all players make a guess about which snail will **win** the race and who will be **last**?
3. Take turns rolling the 2 dice and moving the snails of the 2 colours on the dice 1 space ahead. If the same colour is on both dice, that snail moves 2 spaces.
4. Keep going until one snail crosses the finish line! Whose guess about the winner was right? Now keep going to see who is last!

Another way to play (competitive version):

1. Each player chooses a snail and places it at the start. Decide whether you want to use 1 or 2 dice.
2. Each player takes a turn and rolls the dice. If your colour comes up on 1 dice, move your snail 1 space. If it's on 2 dice, move 2 spaces. If no colour on the dice matches your snail, you have to stay where you are.
3. The first snail to cross the finish wins!
