

# Quick Tips (use with original instructions)

## Yamslam (2-4 players)

### Quick Overview

In Yamslam, you are trying to get the highest total number of point chips overall. On each turn, you can **roll the dice 3 times** to try and get a certain dice combination to earn a point chip. On each roll, you can decide to keep certain dice and continue to re-roll the remaining dice 2 and 3 times to get what you need for the dice combination for a chip. **When all the chips are gone, the game ends.** Notice that there are only 4 chips for each dice combination! Here's a reminder of the combinations and points.

**5 points: 2 PAIRS:** Example:  or .

You need to have **2 pairs** (one pair is 2 identical dice) of dice of any number.

**10 points: 3 OF A KIND:** Example:  or .

You need to have **3 identical dice** of any number.

**20 points: SMALL STRAIGHT:**  or  or .

You need to have **4 dice in a row:** 1-2-3-4 or 2-3-4-5 or 3-4-5-6.

**25 points: FLUSH:** All **5 dice of the same colour.**

All 5 dice need to be odd red numbers (1, 3, 5) or even blue numbers (2, 4, 6).
