

## Quick Start Instructions

### Hisss (2-4 players)

How to play:

1. Take out the snake cards, shuffle them, and fan them out on the table like shown here.
2. Take turns choosing one card to flip over at a time. **All cards remain in the middle**, they don't belong to any player until a snake is finished.
3. If the card flipped over **matches the colour** on another card, then it can be added to that snake so that the matching colours touch. **Rainbow cards** can be added to any colour!
4. If the card **does not match** the colour of any of the snakes already made, start a **new snake**.
5. If you get a piece that can join up two parts of snakes already started, you can join them all to make one longer snake or finish a snake. The snakes can get really long!
6. Once a snake has at least a **tail, middle, and head** it is done. Whoever added the last piece to complete the snake, can keep it in their snake pit!
7. Whoever has the most snake cards in their snake pit at the end wins! So, if a player ended up with the 3 snakes shown here, this player would have 12 points because these snakes are made up of 12 cards!
