Dinosaur Escape (2-4 players)
(a co-operative game where you work together!)

How to play:

1. Put each of the 3 dinosaurs on one of the 3 start spaces with a footprint. Put the 12 fern tokens fern-side up on each of the 12 circle spaces.

2. Players take turns rolling the die. If they get a **number** on the die, they can move any one of the dinosaurs this number of spaces. Then they can **flip over 1 fern token**.

3. **If the fern token shows**:
   - a **dinosaur**: move the dinosaur of the same kind as on the token to Dinosaur Island – this dinosaur has escaped the volcano!
   - the **T-Rex**: move each of the dinosaur tokens in play back to a start space (dinosaurs on Dinosaur Island are safe!)
   - **rocks, bones, or other items**: flip the token back over.

4. If a player rolls a **volcano** on the die, then they start to build, or add a piece to, the volcano.

5. If all the dinosaurs are safe on Dinosaur Island before you finish building the volcano, you all win! If the volcano is completed before the dinosaurs get to Dinosaur Island, the game is over. But maybe next time you'll save them all!
