

Paper Computer Craft

The **Commodore 64** was an 8-bit computer made in 1982. Around 17 million of these computers were sold. It was one of the most popular computers of all time! It ran many video games, including one called Frogger. In the game, players control a frog crossing a busy road and river to get to its home.

Cut out and fold this paper computer to make your own mini Commodore 64. Then visit the Computer Museum to play Frogger on a real one!
