VDI REVIEW

3 Types of VDI Technology

- Sessions Virtualization
- Pooled Desktops
- Personal Desktops

Technology Comparison

	Sessions	Pooled VMs	Personal VMs	
Good	★			
Better	★★			
Best	★★★			
Personalization	★★	★★	★★★	
App compatibility	★★	★★★★	★★★	
Ease of management	★★★★	★★	★	
Cost effectiveness	★★★★	★★	★

LICENSING

Students

- License external connector per server approximately \$1300 per server
- Student Desktop Experience approximately \$25 per student
 - SDE provides the same CALs as staff
 - Provides students with Office while a student and current version after graduation

Staff

- Covered via current Campus Agreement with Microsoft

Focus on Automation

- All servers are Virtual Machines
- Automated scale out and scale down via Microsoft System Center Virtual Machine Manager

Future Possibilities

- Expand beyond single faculty and single application
- Focus on applications that are expensive or hard to install depending on faculty
- Applications such as AutoCAD are possible however user density much less than standard “knowledge worker” requirements

Future Possibilities

- Delegate administration of RDS environment to faculties
- IST to maintain tools and infrastructure while faculties maintain software

STAFF VDI

Staff VDI

- Two pilot uses cases:
 - PCI compliance
 - Support for older software versions
 - Adobe Acrobat
 - Sun Java

Staff VDI Future Uses

- Part of disaster/pandemic planning
- Areas where data loss or theft is a concern
- Users that need “always on” experience
