Planning for a Successful Defence in Math

The Mathematics Graduate Office (MGO) website has detailed information on the important steps that you and your supervisor need to follow when preparing for your PhD defence in the Faculty of Mathematics. In addition, the MGO will be sending you emails to explain the process and remind you of your next steps once the date of your defence is set and the PhD examining committee has been approved.

Please contact the MGO (mgo@uwaterloo.ca) or your graduate coordinator if you have any questions about this process.

PhD Thesis Defence Backwards Planning Tool Faculty of Mathematics

As you start thinking about the end stages of your PhD, it is important to understand the processes and timelines related to the thesis defence, so that your degree completion is not delayed. This backwards planning tool, will help you identify some of the major administrative tasks that need to be completed and assist you in establishing a realistic degree completion date.

There are general PhD Thesis Examination regulations that apply to all University of Waterloo PhD students, but there are some differences in administrative practices between the six faculties. As such, this backwards planning tool is designed specifically for PhD candidates in the **Faculty of Mathematics**. If you have not already done so, take some time to review the PhD Thesis Examination regulations in addition to using this tool.

Instructions: Enter a proposed degree completion date and work backwards, filling in the remaining dates using the timeline indicated. You may wish to consider planning a degree completion date around tuition refund deadlines or convocation deadlines. These dates can be found in the important dates calendar.

Note: Where the planning map indicates <u>minimum</u> timeframes early completion of these tasks is recommended.

Online resources:

- PhD Thesis Examination regulations
- Important dates calendar

*Students should NOT be communicating with the external examiner prior to the defence. Talk to your supervisor to ensure this take places in a timely manner.

**If the decision at an oral defence is 'accepted', students have a maximum of one month to complete revisions and have their thesis accepted into UWSpace. For more information on decisions and timelines, please see the PhD Thesis Examination Regulations.

•Minimum eight weeks prior to date 'E' •Proposed date: Date A Submit Notice of PhD Thesis Submission for Display and Oral Defence form •Minimum seven weeks prior to date 'E' Date B •Proposed date: _____ Submit thesis •Minimum five weeks prior to date 'E' •Proposed date: _____ **Date C** Submit Notice of Receipt of PhD Thesis •Minimum four weeks prior to date 'E' **Date D** •Proposed date: •Hold oral defence •Maximum one month prior to date 'G' (accepted**) Date E •Proposed date: _____ Submit thesis to UWSpace for approval •Approximately two weeks (recommended minimum of one week, but preferably 10 business days) prior to date 'G' **Date F** •Proposed date: _____ •Degree completion (Thesis accepted into **UWSpace**) •Proposed date: _____ Date G

•Pre-approval of External Examiner*
