PARTICIPANTS NEEDED FOR RESEARCH IN UPPER EXTREMITY BIOMECHANICS

We are looking for right-handed, male and female volunteers to take part in a study investigating muscle activity in individuals with different breast tissue thicknesses.

As a participant in this study, you will be asked to:

- Have ultrasound of the chest
- Have surface electrodes placed on your chest muscles to examine muscle activity
- Conduct a series of exertions in different planes with your dominant arm.

Your participation would involve one session (~3 hours). In appreciation for your time, you will receive a \$30 giftcard.

For more information about this study, or to volunteer for this study, please contact:
