Course Objectives and Expectations

Econ 101 is an introductory course in which you will learn that market forces – demand and supply – allocate scarce resources efficiently under certain assumptions. You will study that the key principles driving market forces are determined by the natural optimizing proclivity of economic agents. You will also discover the limitations of the market in generating optimal outcomes.

The assumptions that drive these results will strike you as unrealistic (they are!), but don't let that disenchant you from learning a subject that will be essential for more enjoyable classes you might take as you advance through your studies. The course is NOT intended to capture all the complexities of the world; rather, it is meant to convey certain basic principles guiding the economy. To illuminate the subject's abstract ideas and key principles, students will read certain carefully selected articles and present their views in class in groups of five to six people, addressing specific questions they will be asked based on the articles.²

If you are intrigued by the insights you gain from the course (you might!), take them only seriously, not literally. It is also possible that you remain unconvinced about the assumed optimizing tendencies of economic agents and the implications thereof after taking the class. Indeed, some economists have similar perspectives and have been trying to offer what they see as alternative explanations of how the economy works.

¹ Viren will assist students with questions pertaining to *MyEconLab*.

² For further details, refer to the Class Presentation Guidelines (CPG) posted on LEARN.

Required Textbook:

Microeconomics: Canada in the Global Environment Plus *MyLab* Economics (11th Edition). You can obtain the online edition (with *MyLab*) at the bookstore.

Additional Course Resources:

I will post the instruction for the presentations on **LEARN**. All other documents (e.g., lecture notes) and announcements pertaining to the course will also be posted on **LEARN**. Here is the website:

<http://learn.uwaterloo.ca>.

Grading:

Your grade for this course will be determined as follows:

Weekly Assignments using *MyLab*: 10%

- Viren will send you the Access code for how you will access *MyLab*, and she will be the person you will need to contact for any question you may have re: the weekly assignments.
- Please refer to the Weekly Assignment Guidelines (WAG) to be issued via LEARN re: what you need to do to complete the assignments.

Midterm (October 18): 25%

- The midterm will be conducted on October 17 or 19 on the **first five modules** of the course.

Class Presentations (Each Week): 25%

- Please read carefully the class presentation guidelines (CPG) posted on LEARN. The criteria for the assignment of the class presentation grade will be specified in the CPG.
- Specific Instructions will be issued via LEARN for each presentation after the first class.
- In the first week, students will form the presentation teams, and based on that, Viren will issue via LEARN a schedule of presentations for the entire term.

Final Exam (TBA): 40%

- The final exam is scheduled centrally via the registrar's office.

Cross-listed course

Please note that a cross-listed course will count in all respective averages no matter under which rubric it has been taken. For example, a PHIL/PSCI cross-list will count in a Philosophy major average, even if the course was taken under the Political Science rubric.

Academic Integrity

Academic Integrity: In order to maintain a culture of academic integrity, members of the University of Waterloo are expected to promote honesty, trust, fairness, respect and responsibility. See the [UWaterloo Academic Integrity](#) webpage and the [Arts Academic Integrity](#) webpage for more information.

Discipline: A student is expected to know what constitutes academic integrity, to avoid committing academic offences, and to take responsibility for his/her actions. A student who is unsure whether an action constitutes an offence, or who needs help in learning how to avoid offences (e.g., plagiarism, cheating) or about “rules” for group work/collaboration should seek guidance from the course professor, academic advisor, or the Undergraduate Associate Dean. When misconduct has been found to have occurred, disciplinary penalties will be imposed under Policy 71 – Student Discipline. For information on categories of offenses and types of penalties, students should refer to [Policy 71 - Student Discipline](#). For typical penalties check [Guidelines for the Assessment of Penalties](#).

Grievance: A student who believes that a decision affecting some aspect of his/her university life has been unfair or unreasonable may have grounds for initiating a grievance. [Read Policy 70 - Student Petitions and Grievances](#), Section 4. When in doubt, please be certain to contact the department’s administrative assistant who will provide further assistance.

Appeals: A decision made or penalty imposed under Policy 70 - Student Petitions and Grievances (other than a petition) or Policy 71 - Student Discipline may be appealed if there is a ground. A student who believes he/she has a ground for an appeal should refer to [Policy 72 - Student Appeals](#).

Accommodation for Students with Disabilities

Note for students with disabilities: [The AccessAbility Services office](#), located on the first floor of the Needles Hall extension (1401), collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with the AS office at the beginning of each academic term.

If you are using Turnitin® in your course

Turnitin.com: Text matching software (Turnitin®) will be used to screen assignments in this course. This is being done to verify that use of all material and sources in assignments is documented. Students will be given an option if they do not want to have their assignment screened by Turnitin®. In the first week of the term, details will be provided about arrangements and alternatives for the use of Turnitin® in this course. Note: students must be given a reasonable option if they do not want to have their assignment screened by Turnitin®. See [guidelines for instructors](#) for more information.

Outlines for ECON 101 and 102 must include the following statement:

It is the responsibility of students to ensure that they write exams in the location, date, and time assigned to their section. Students writing exams in the wrong section will be assessed a 20% penalty on the final exam grade. There will be no accommodation for possible differences in exam material or content.

(The above statement is also recommended for ECON 201, 206 and 207)

NEW – Recommended statements to be included on course outlines
