Fall 2023 TA Job Posting for ECON 322 Tutorial

Please give a brief description of the course content or a link to the course outline:

Course seeks to help students understand when regression analysis yields good estimates.

Any necessary knowledge or skills needed:

Undergraduate econometrics, including R programming language (Stata an asset). Basic ChatGPT ability and access.

Please fill out this chart as closely as you can for the TA duties and hours you predict the course will be using for the entire Fall 2023 term. This will be used as an estimation only. Graduate TAs are not permitted to work more than 140 hours for the term or more than 10 hours in any given week (70 hours or 5 hours a week for a ½ TA). When thinking of the duties you might have for your TA, we ask that you be mindful of this constraint and try not to come up against it. TAs own coursework comes first. Negotiations for a reasonable amount of time for returning marked assignments, etc. will occur as needed.

Duty	Estimated Hours for the Term or N/A	Brief description of unusual or especially time-consuming features of the duty, if any
Meetings with Course Instructor	10	
Class preparation	0	
Attending lectures	0	
Student consultation; office hours	0	
Lecturing	0	
Conducting tutorials	60	Time commitment includes preparation time. Task is to help students learn how to run regression analyses using R/Stata and how to take advantage of ChatGPT in these analyses.
Grading	0	
Proctoring exams		
Other duties (describe/explain)	0	
Totals	70
