A. ☐ Approval of Required Course for an Option/Minor
In certain circumstances, it is necessary to approve a particular course for an Option or a Minor. For example, the Biomechanics Option requires that the List D Project (ECE 492A/B) must be approved as being within the area of biomechanics.

B. ☐ Approval of Required Course for an Option/Minor
Due to scheduling, a student may not be able to take a required course for an Option or a Minor but has arranged to substitute another course as an equivalent. Because the ECE Department uses the Undergraduate Calendar to confirm that a student has satisfied the requirements of an Option or Minor, we must have written approval for the substitution.

For the benefit of other students taking the Option or Minor, we would ask the Option/Minor Co-ordinator to indicate whether this substitution should be considered to be allowable in general or is a special case for this student only.

☐ This substitution is approved for this student only. Option/Minor Co-ordinator Initials: __________
