ECE 630
Physics and Models of Semiconductor Devices

Department of Electrical and Computer Engineering
University of Waterloo

Course outline
Fall 2021

Instructor: Guo-Xing Miao
Class days: Sept. 8 (Wed.) – Dec. 7 (Tue.)
Normal lectures: online, recording posted weekly
Instructor’s contact info: guo-xing.miao@uwaterloo.ca
TA’s contact info: TBD
Course description

Covers the basics of semiconductor physics. The emphasis is on the fundamental physical and operational principles behind semiconductor and optoelectronic devices, such as the formation and modification of semiconductor band structures, the mechanisms influencing carrier population and electrical conduction, the light-matter interactions for photon absorption and emission.

Textbooks

Physics of Semiconductor Devices, Sze S.M. and Ng Kwok K., Wiley publications

Grading scheme

6 marked assignments: posted in weeks of Sept.20, Oct.4, Oct.18, Nov.1, Nov.15, and Nov.29 (2nd, 4th, 6th, 8th, 10th, 12th week), due by the end of Sunday -- Turn in the completed assignments to Learn’s dropbox folder. Late homework not accepted.

Final grading: Assignments #1,2,4,5, 60% (15% each)
Assignments #3,6, 40% (20% each, a bit heavier than normal to take the place of midterm and final)
Additional university policies:

Academic Integrity: In order to maintain a culture of academic integrity, members of the University of Waterloo community are expected to promote honesty, trust, fairness, respect and responsibility. [Check www.uwaterloo.ca/academicintegrity/ for more information.]

Grievance: A student who believes that a decision affecting some aspect of his/her university life has been unfair or unreasonable may have grounds for initiating a grievance. Read Policy 70, Student Petitions and Grievances, Section 4, www.adm.uwaterloo.ca/infosec/Policies/policy70.htm. When in doubt please be certain to contact the department’s administrative assistant who will provide further assistance.

Discipline: A student is expected to know what constitutes academic integrity [check www.uwaterloo.ca/academicintegrity/] to avoid committing an academic offence, and to take responsibility for his/her actions. A student who is unsure whether an action constitutes an offence, or who needs help in learning how to avoid offences (e.g., plagiarism, cheating) or about “rules” for group work/collaboration should seek guidance from the course instructor, academic advisor, or the undergraduate Associate Dean. For information on categories of offences and types of penalties, students should refer to Policy 71, Student Discipline, www.adm.uwaterloo.ca/infosec/Policies/policy71.htm. For typical penalties check Guidelines for the Assessment of Penalties, www.adm.uwaterloo.ca/infosec/guidelines/penaltyguidelines.htm.

Appeals: A decision made or penalty imposed under Policy 70 (Student Petitions and Grievances) (other than a petition) or Policy 71 (Student Discipline) may be appealed if there is a ground. A student who believes he/she has a ground for an appeal should refer to Policy 72 (Student Appeals) www.adm.uwaterloo.ca/infosec/Policies/policy72.htm.

Note for Students with Disabilities: The Office for Persons with Disabilities (OPD), located in Needles Hall, Room 1132, collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with the OPD at the beginning of each academic term.

Turnitin.com: Plagiarism detection software (Turnitin) will be used to screen assignments in this course. This is being done to verify that use of all material and sources in assignments is documented. In the first week of the term, details will be provided about the arrangements for the use of Turnitin in this course.

Note: students must be given a reasonable option if they do not want to have their assignment screened by Turnitin. See: http://uwaterloo.ca/academicintegrity/Turnitin/index.html for more information.

Fair Contingencies for Emergency Remote Teaching. To provide contingency for unforeseen circumstances, the instructor reserves the right to modify course topics and/or assessments and/or weight and/or deadlines with due notice to students. In the event of further challenges, the instructor will work with the Department/Faculty to find reasonable and fair solutions that respect rights and workloads of students, staff, and faculty.
Online Academic Integrity for Individual Assessments. For all graded course assessments, students are expected to work individually and submit their own original work. Under Policy 71, the instructor may have follow-up conversations with individual students to ensure that the work submitted was completed on their own. Any follow up will be conducted remotely (e.g., MS Teams, Skype, phone), as the University of Waterloo has suspended all in-person meetings until further notice. Any permissions for collaboration on assessments (e.g., team project) must be provided by the instructor in writing.

Compassionate Consideration. If you are facing challenges that are affecting more than one course, please contact your Associate Chair or Director of your program. They will review your case and coordinate a reasonable and fair plan in consultation with appropriate others (for example: Instructors, Department Undergraduate Studies Committee, Chair, AccessAbility Services, Engineering Counselling services, Registrar's Office).

Wellness Support and Contact Information. We all need a support system. We encourage you to seek out mental health supports when they are needed. Please reach out to Campus Wellness and Counselling Services. We understand that these circumstances can be troubling, and you may need to speak with someone for emotional support. Good2Talk is a post-secondary student helpline based in Ontario, Canada that is available to all students including outside Ontario. MATES is a one-to-one student peer support program offered by the Waterloo Undergraduate Student Association in consultation with Campus Wellness. MATES provides support to students who are hoping to build social skills, or are experiencing personal or academic concerns or low-level mental health and wellness difficulties.
