

## The University of Waterloo 1969 Electrical Engineering 55<sup>th</sup> Reunion

Years ago, we all made decisions that would prepare us for the life ahead and one of them was deciding to go to the University of Waterloo. Whatever the criteria, we made it through and could now declare ourselves Waterloo Engineers, no small feat. Now we can celebrate that achievement 55 years later. It's a special anniversary both for its longevity and its meaning to you for the accomplishment itself and for friendships and memories.

As always, Engineering Alumni Affairs has organized the June 1<sup>st</sup> weekend program and left Friday May 31<sup>st</sup> open for each class to arrange its own event. There is a consensus among all disciplines, including our Electrical Engineering class, that we have a casual barbeque for those, including spouses/guests, arriving Friday evening any time after 6:00 PM. This will be at the home of Ron & Chris Ojanpera, 241 Roxton Drive, Waterloo ON, N2T 1N9, which is close to the University.

This will be a memorable kick-off for the weekend and worked very well for our, -40, -45 and 50-year events. We can now consider this a collective Engineering class of 1969 tradition.

BYOB like old times. We will have a collection pot at the event to split the nominal cost for non-alcoholic refreshments food etc.

RSVP to me, your Electrical Engineering class rep, using my email below and I will forward the list by May 10<sup>th</sup> to Ron to estimate overall numbers.

I look forward to seeing you in June!

Your EE 1969 Class Rep,  
Dennis Rittenhouse
