

UW 25-year REUNION - SYDE Class of '99

May 31 - June 2, 2024

Waterloo, ON

Hi OASYS I've agreed to be your class rep again this year - and hard to believe 25 years have passed since we left Waterloo! I'm hoping to see many of you this spring. Details are below for events for the weekend - and registration will be opening shortly [here](#).

Reach out if you have any questions for me - my contact info is below. And please do share this with anyone that isn't receiving these emails (I'm getting my lists from my own contacts and the list the school has provided).

I'll keep this doc updated and will post updates in [this LinkedIn group](#) (stealing from past years!). Please join if you haven't already.

And since this has recently emerged again - thought I'd share. For those that might not know/remember, my dad is also a UW Eng grad (Mech class of '66). One of his close friends originally designed our logo - and recently dug up his original design submission 😊. Veikko still lives in Kitchener and still keeps busy building, fixing and designing still!

WEEKEND SCHEDULE
