ENGL 191 - Communication in the Engineering Profession

This week, I have been stepping up my prognosis projects. I am looking forward to starting a new research-oriented assignment. Addition to work, working on the communication task has been a significant step for me. I always look to expand our collaborative brainstorming sessions and gain meaningful insights to work by myself. At the U of A, I am continuously cultivating learning everyday. - Jessica MacIntosh

Benison University College

This week, I am creating an announcement to provide to ESSM.状况 is the full information for Fall 2022. For example, I made an announcement about an essay writing prompts the Writing and Communication Centre. This announcement will be posted weekly for release during the midterms of Fall, when students are likely to be heavily involved in writing assignments. I am looking forward to working on these announcements as I would find the type of content helpful from a student’s perspective. - Hannah Hitchen

Senior Online Learning Advisor

At the University of Waterloo, my role as OLA has become more manageable. I have learned a lot about teamwork, which has helped the group in developing more awareness of my expectations, the tasks of their roles, and their projects, as well as their expectations of me. OLA. I feel fortunate to continue to implement my learnings, am still in touch with the group, and my expectations. I hope to continue to have the same level of teamwork and communication.

Microsoft Teams

Microsoft Teams is an online communication software that supports sending messages, sharing files, and video calls. A instructor can create channels for each student group, add files to each channel for collaboration, and then the files are stored in history to assess student individual contributions. The following resources provide information on how to use Microsoft Teams. The following are a few examples:

- Create a Microsoft Team through the University of Waterloo
- Create a channel on Teams
- Video Tutorial: Using Microsoft Teams to support student group projects
- Add files on Microsoft Teams
- OLAs are named in an online group work that has practiced. Our team has researched various software to support instructors in providing students with a sense of online learning experience. Reach out to each OLA if you have any issues related to accessibility.

Planning and Scheduling

Group Work

Facilitating a group work in an online course can be challenging. To help students plan and schedule their group work, use the following hints:

1. Establish a group contract. This increases accountability and allows students to understand their individual responsibilities.
2. For more information and group contract templates, click here.
3. Encourage students to track and organize the project of their group project on software such as Trello. Trello is a collaborative online organization tool that allows a card and board style of planning to track and organize tasks. Find more information about Trello by clicking here.
