University of Waterloo  
School of Environment, Resources and Sustainability  

ERS 318 Photography for Sustainability  
Fall 2018  

Dr. Rob de Loë

Class sessions: Wednesdays 1:30 AM to 2:20 PM (Design Studio – EV3)  
Lab sessions: Thursdays 12:30 PM to 2:20 PM (DMC – EV2 2052)  

1. CONTACT INFORMATION

Office: EV2 2029  
Telephone: 519-888-4567 x38648  
E-mail: rdeloe@uwaterloo.ca  
Office Hours:  
• Wednesdays and Thursdays for drop-ins (see course web site for details)  
• Otherwise by appointment

2. ABOUT THE COURSE

What does sustainability look like? Can we know it when we see it? Is every picture of bicycles and windmills necessarily showing “sustainability”? In this course, you’ll learn how to use photographs to communicate ideas effectively and with greater impact in presentations, posters, theses, scientific reports, campaigns and other work. You’ll develop and strengthen practical photography skills such as composition, exposure, digital image processing, photographic workflows, printing, sequencing and curation.

You’ll use the photography skills you learn in the course to create a major project that combines text and images that communicate challenges and opportunities relating to a sustainability topic that interests you.

3. APPROACH

The course runs on a studio and lab model. Each week will involve a three-hour, hand’s-on learning session in the Faculty of Environment’s Design Studio, and a separate two-hour lab session in the Faculty of Environment’s Design and Modelling Centre (DMC).

• Through three skills-building assignments, described below, you’ll develop your technical skills and practice idea-driven photography via groups of pictures.
• The major project focuses on the course theme of “photography for sustainability”. To complete this assignment, you’ll conduct background research, develop a portfolio of images designed to communicate sustainability or unsustainability, and prepare supporting text.
• Peer mentoring and support are critical during the course, not only during critique sessions (where we help each other strengthen our images and ideas) but also during workshops and labs.
4. WHAT YOU CAN EXPECT FROM THE COURSE

By the end of the course, you will develop knowledge and skills in the following areas relating to photography:

- Greater fluency in the language of photography
- A better understanding of the strengths and limitations of photography as a tool for communicating ideas about sustainability
- Basic digital photography and image processing skills using Adobe Lightroom
- Printing and curation skills in support of photographic projects

Additionally, through individual research and study relating to your major assignment topic, you will strengthen your understanding of sustainability challenges in a specific area of your choice.

5. REQUIRED READINGS

Required and recommended readings are identified on the course’s LEARN web site. You will not have to purchase any of the readings.

This is a reading-heavy course. During the class sessions we’ll have discussions relating to key topics covered by the readings. However, I’m not using content-heavy lectures to teach material. Self-learning is critical. You have to fill gaps in your knowledge through the readings I suggest, and through your own reading.

6. CAMERA EQUIPMENT

This is a digital photography course. You are responsible for supplying your own RAW-capable digital camera and accessories; you may use your phone camera as a supplementary camera, but you need an actual camera. Consult this page for requirements: https://uwaterloo.ca/scholar/rdeloe/what-kind-camera-will-you-need

7. COMPUTING RESOURCES

The Design and Modelling Centre (DMC) located in EV2 2052 is the computer lab we’ll use for the course. The DMC will be available for your exclusive use during the scheduled lab time. It’s also available when it isn’t being used by other courses (see schedule on the door).

The DMC is a Mac lab. If you’re not a Mac user, you’ll have to learn how to use OS X and Mac computers on your own. You are also responsible for learning how to log onto the computers and the network, and for making backup copies of all your work.

We’re using Adobe Lightroom 6.14 for image processing and cataloguing. I will provide some LR training during lab sessions, but for the most part the onus is on you to learn how to use Lightroom and any other software we’re using. The course web site will point you to good Lightroom resources on the Internet, and I’ve purchased copies of books you can borrow.

If you’re willing to purchase your own license for Lightroom you can do so and install it on your own computer. Lightroom for Mac and Windows are basically the same, so if you prefer to do all your work on your own Windows or Mac laptop computer this is an option to consider.
You are personally responsible for storing and managing your own Lightroom catalogues and image files on your own external device. If you don’t own a good quality, fast external storage device, you need to buy one for the course. You will also need at least one backup device, and, ideally, a cloud-based backup service. See the course web site for additional information.

8. **LAB FEE**

The course involves a lot of printing through Retail Services. A lab fee of $50.00 is charged to cover printing expenses.

9. **COURSE SCHEDULE**

_A detailed weekly schedule showing topics and due dates is available on the course web site._

During September and October, a lot of learning will happen during class and lab time slots. You’ll complete skills-building assignments and you’ll develop the foundation for your major project. During November, the focus shifts to development of your major project.

10. **EVALUATION**

Details regarding graded course components are provided on the course web site. This section provides a brief overview.

**Major Project (60%)**

In the major project assignment, you’re going to use your photography skills to make six pictures that work together as a group to communicate one or more key _ideas_ relating to a sustainability topic of your choice. To support your pictures, you’re going to conduct extensive background research and write supporting text. The project culminates in an open house in the SERS hallway on November 28th during class time.

Your project can focus on any relevant sustainability theme, scale or topic. Importantly, to complete your major project you will have to conduct extensive literature-based research to develop the sophisticated understanding of what sustainability means in the context of the topic you’ve selected.

The sub-components of the Major Project include the following:

- Annotated Bibliography (5%) – due October 5
- Project Plan (10%) – due October 11
- Background Research Report (20%) – due October 26
- Draft and Final project photos and text (25%) – various deadlines leading up to the project open house on November 28

**Skills Building Assignments (30%)**

Three skills building assignments are worth 8%, 10% and 12%, respectively, for a total of 30%. In these assignments, you’ll make photographs (six per assignment) that explore assigned themes. Due dates for the three assignments are September 25, October 15 and October 29.
Class Contributions (10%) 

The quality of collective learning in the course will depend strongly on the quality of individual contributions during class/studio sessions. As mentioned in the Readings section, I’m not going to deliver content-heavy lectures. Instead, I’m expecting that you will come to class well-versed in the material in the readings, and ready to share your thoughts. Additionally, I’ll expect you to offer thoughtful, constructive insights into the work your peers are producing during critique sessions, project share-out sessions and workshops.

This experiential type of course needs to be a bit more flexible than a regular classroom course. I’ve designed the schedule and assignments as carefully as possible, but I may need to make changes to the course as described here so that it works better. I will let you know in advance. On rare occasions a change may have to be unilateral and mandatory.

11. RIGHTS AND RESPONSIBILITIES

This section is divided into two parts: (1) my policies regarding consultation, use of computers and tablets during class, email, late assignments, etc., and (2) specific University policies that you need to understand. Contact me to discuss any concern you have regarding your rights and responsibilities as outlined here.

(1) My Policies

Consultation
Feel free to visit or phone me during my scheduled office hours (see page 1); check the schedule on the course web site for times when I’m likely to be in the office. If I’m with someone else or on the phone when you drop by, please wait until I’m finished before knocking.

On the remaining days of the week, I’m going to be busy with administrative tasks, course preparation and marking, other classes, research projects, graduate student supervision, writing, scheduled appointments and other tasks. Please don’t disturb on these days unless it’s a dire emergency.

If you need to see me in person outside of my scheduled office hours, I’m always happy to make an appointment.

Laptops, Tablets and Mobile Phones
We’re going to use cell phones and laptops during most class sessions. However, I need you to be professional. Use them only for class-related work, including making notes and accessing course materials during class sessions. Checking email, browsing web sites, shopping, posting comments on social media, etc. during class time is unprofessional and disruptive.

Recording During Class
With prior permission from me, you may record audio during class for your personal use only. You may not make video recordings. Violation of these rules may be deemed academic misconduct under University of Waterloo Policy 71.
Consent to Photography
I would like to make photographs of you during class times. These images may be used for social media, to advertise the public presentation, and for related educational purposes. I will ask you to complete a permission form online.

Email Policy
Email is an excellent way to contact me about straightforward problems and questions – and you don't have to wait for my scheduled consultation time. I will respond to your emails as promptly as possible. However, please be aware that I usually receive 50 or more emails per day that require a response. Therefore, it may take me a day or two to reply to your message.

Note that email is the official channel of communication between the University and its students. You are required to check your uwaterloo.ca email account regularly; I recommend that you check for course-related emails at least once per day. **If you use another email service (e.g., GMail), it is your responsibility to ensure that mail sent to your uwaterloo.ca account is forwarded to your other account.**

Course LEARN Web Site
The following material is available on the course web site:

- Announcements
- Schedule of dates
- A schedule of my general availability
- Instructions and handouts (e.g., detailed instructions for the assignments)
- Week-by-week overview of topics covered, along with readings and copies of slides from lectures
- Resources (e.g., links to key web sites, lists of journals, feedback on assignments)
- **It is your responsibility to learn how to use the course web site, and to check regularly for information and updates.**

Login to LEARN via: [http://learn.uwaterloo.ca/](http://learn.uwaterloo.ca/) Use your WatIAM/Quest username and password. Documentation is available through the LEARN website.

When You Cannot Meet a Course Requirement Due to Illness or Other Reasons
If you find yourself unable to meet an in-course requirement because of medical, compassionate or other reasons, please advise me by email; make sure to include the course number and name, your name and student ID number in your message. Where possible, you must contact me in advance of the assignment due date, but otherwise as soon as possible after the due date. As a rule, you must provide appropriate documentation, for example, a note from your doctor indicating the dates during which you were ill, and describing the severity of your illness.

*Manage your time carefully. Pressure of work, computer glitches, etc. are not an acceptable reason for seeking an extension without penalty.*
**Assignment Submission and Late Penalties**

Assignments must be submitted through the course web site by the time and date specified in the instructions for that assignment. I will not accept assignments submitted any other way, e.g., in hard copy, or sent as email attachments.

Unless I have indicated otherwise, I will accept late assignments. However, late assignments normally will be penalized at the rate of 5 percent of the value of the assignment per day, including Saturday and Sunday. I will not accept assignments more than 5 days after the due date unless we have a prior arrangement.

**Required Style Guide**

Subject to special instructions contained in supplementary course material, assignments for this course must be completed according to the instructions in the following booklet. I will provide you with a paper copy of the booklet. An electronic copy of the booklet is available through the course web site.

**Group Work and Collaboration**

Discussing assignments with your colleagues is an excellent way to learn from your peers and to test your ideas. However, unless otherwise noted, you must complete assignments individually.

**Use of Turnitin**

I’m not using Turnitin in this course.

**(2) University of Waterloo Policies**

The following policies apply to all students and are pertinent to all undergraduate courses at the University of Waterloo.

See [https://uwaterloo.ca/secretariat-general-counsel/policies-procedures-guidelines](https://uwaterloo.ca/secretariat-general-counsel/policies-procedures-guidelines)

**Academic Integrity**

In order to maintain a culture of academic integrity, members of the University of Waterloo community are expected to promote honesty, trust, fairness, respect and responsibility. See [http://www.uwaterloo.ca/academicintegrity/](http://www.uwaterloo.ca/academicintegrity/). Students who are unsure what constitutes an academic offence are requested to visit the on-line tutorial at: [http://www.lib.uwaterloo.ca/ait/](http://www.lib.uwaterloo.ca/ait/)

*Hurried or careless submission of work does not exonerate students of responsibility for ensuring the academic integrity of their work.*

**Research Ethics**

The University of Waterloo requires all research conducted by its students, staff, and faculty which involves humans as participants to undergo prior ethics review and clearance through the Director, Office of Human Research and Animal Care (Office). The ethics review and clearance processes are intended to ensure that projects comply with the Office’s Guidelines for Research with Human Participants (Guidelines) as well as those of provincial and federal agencies,
and that the safety, rights and welfare of participants are adequately protected. The Guidelines inform researchers about ethical issues and procedures which are of concern when conducting research with humans (e.g. confidentiality, risks and benefits, informed consent process, etc.).

If the development of your research proposal consists of research that involves humans as participants, the please contact the course instructor for guidance and see:
http://iris.uwaterloo.ca/ethics/

---

**Note for Students with Disabilities**
The Office for Persons with Disabilities (OPD), located in Needles Hall, Room 1132, collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with the OPD at the beginning of each academic term.

**Religious Observances**
Please inform me *before the end of the first week of class* if you need me to make special accommodations for religious observances that are not otherwise accounted for in the scheduling of classes and assignments.

**Grievances**
A student who believes that a decision affecting some aspect of his/her university life has been unfair or unreasonable may have grounds for initiating a grievance. Read Policy 70 - Student Petitions and Grievances, Section 4. When in doubt, please contact your Undergraduate Advisor for details.

**Discipline**
A student is expected to know what constitutes academic integrity, to avoid committing academic offence, and to take responsibility for his/her actions. A student who is unsure whether an action constitutes an offence, or who needs help in learning how to avoid offences (e.g., plagiarism, cheating) or about “rules” for group work/collaboration should seek guidance from the course professor, academic advisor, or the Undergraduate Associate Dean. For information on categories of offences and types of penalties, students should refer to Policy 71, Student Discipline. For typical penalties, check Guidelines for Assessment of Penalties.

**Appeals**
A decision made or penalty imposed under Policy 70 - Student Petitions and Grievances (other than a petition) or Policy 71 – (Student Discipline) may be appealed if there is a ground. A stu-
dent who believes he/she has a ground for an appeal should refer to Policy 72 (Student Appeals).

Consequences of Academic Offences
Students are strongly encouraged to review the material provided by the university’s Academic Integrity office. See http://uwaterloo.ca/academicintegrity/Students/index.html
