SUSTAINABLE AGRICULTURE

ERS 270

Course Outline: January 2018

"Bring diversity back to agriculture. That's what made it work in the first place" – David R. Brower

Please read this course syllabus. It will answer many of your questions related to this course.

COURSE DESCRIPTION

This course provides both survey and detailed examinations of the ethics, science, and techniques involved in sustainable agriculture. Topics normally include management of crops, soil, water, nutrients, wastes and pesticides, integrated pest management, organic farming, permaculture, ecological farm planning, use of genetically modified organisms, urban agriculture in developing nations, and innovations such as computer modelling and precision farming. This course is available on D2L (Learn).

COURSE GOAL

To introduce the fundamental concepts of sustainable agriculture and agroecology; and to introduce the major factors that lead to the interaction between people, society and agroecosystem and system-level interactions.

INTENDED LEARNING OUTCOMES

1. Agroecology

• Understanding the agroecosystem concept and why fundamental change in agriculture is needed

- 2. Crops, Abiotic Factors of the Environment and Autoecology
 - Understanding biotic and abiotic factors affecting crop production and agroecosystems and positive and negative impacts of heterotrphic organisms

3. System-Level Interactions

• Understanding population ecology, genetic resources in agroecosystems & species interactions

4. Transitioning to Sustainability

• How to convert to an ecologically based management system and what are the indicators of sustainability. What are sustainable food systems: integrating agriculture, society & agroecology

COURSE MEETING TIMES & LOCATION

Lecture Times	Location
Friday 8:30 am – 11:20 am	HH 1108

INSTRUCTIONAL TEAM

	Professor	TEACHING ASSISTANT
NAME	Prof. Dr. M. Oelbermann	Meagan Baserville
CONTACT INFORMATION	Office: EV-2, room 2008 E-mail: <u>moelbermann@uwaterloo.ca</u>	Contact via Learn
	Phone: 519-888-4567 Ext. 37552	
OFFICE	TBD	TBD
HOURS		

COURSE MATERIALS

This textbook is available in the UW Bookstore: Required

Stephen R. Gliessman. Agroecology: The Ecology of Sustainable Food Systems, 3rd Ed., CRC Press, 2015

Additional (*but not required for the course*) readings to supplement the textbook will be available on Learn. These readings will be relevant to the material discussed in class; help with the assignment and provide further insight for interested students.

COURSE ASSESSMENT

LEARNING OUTCOME	Assessment Methods (Formative & Summative)	% OF OVERALL GRADE	TEACHING & Learning Methods
 Agroecology Crops, Abiotic Factors of the Environment and Autoecology 	 Class discussions Midterm 1 in class (lectures 1 to 4) 	0 30	 Interactive lectures Case studies Video presentation Textbook readings Course website PowerPoint slides
 System-Level Interactions Transitioning to Sustainability 	 Midterm 2 in class (lectures 5 to 8) Class discussions Final exam (cumulative) 	30 0 40	 Interactive lectures Case studies Video presentation Textbook readings Course website PowerPoint slides

MODULE #	DAY OF LECTURE	LECTURE #	Торіс	READING MATERIAL
Module 1: Agroecology	January 5, 2018	1	 Introduction to ERS 270 Change in agriculture Agroecology & agroecosystems 	Introduction Chapter 1 Chapter 2
Module 2: Crops, Abiotic Factors of the Environment & Autoecology	January 12, 2018	2	 Crops Light Temperature DVD: Real Dirt on Farmer John 	Chapter 3 Chapter 4 Chapter 5
	January 19, 2018	3	- Soil - Soil Water	Chapter 8 Chapter 9
	January 26, 2018	4	- Humidity & Rainfall - Wind - Fire	Chapter 6 Chapter 7 Chapter 10
	February, 2, 2018		- MIDTERM 1 (lectures 1 to 4)	
Module 3: System-Level Interactions	February 9, 2018	5	 Biotic factors & organisms Environmental complexity 	Chapter 11, 13 Chapter 12
	February 16, 2018	6	 Population ecology Genetic resources Species interactions DVD: The Future of Food 	Chapter 14 Chapter 15 Chapter 16
	February 19 to 23 rd , 2018		- READING WEEK	
	March 2, 2018	7	 Agroecosystem diversity Animals in agroecosystems 	Chapter 17 Chapter 19
	March 9, 2018	8	- Agroecosystem disturbance, succession & management	Chapter 18 Chapter 21
Module 4: Transition to Sustainability	March 16, 2018	9	 MIDTERM 2 (lectures 5 to 8) Converting to ecologically based management 	Chapter 22 Chapter 23
	March 23, 2018	10	 Agriculture, society & agroecolgy Sustainable food systems 	Chapter 24 Chapter 26

SUMMARIZED SCHEDULE OF COURSE ACTIVITIES

DETAILED SCHEDULE OF COURSE ACTIVITIES

MODULE I: AGROECOLOGY

LECTURE 1

Introduction to ERS 270: Sustainable Agriculture

- Course outline
- Course expectations

Agroecology & Agroecosystems (Chapters 1 & 2)

- The case of why a fundamental change in agriculture is needed
- What is agroecology
- What are agroecosystems; agroecosystems within the context of the food system

MODULE 2: CROPS, ABIOTIC FACTORS OF THE ENVIRONMENT & AUTOECOLOGY

LECTURE 2

Crops, Light & Temperature (Chapters 3, 4 & 5)

- Crop nutrition; crops and their interaction with the environment
- Importance of light and photosynthesis for crops; managing light in agroecosystems
- Sources of heat, variation in temperature, response of plants to temperature; microclimates; temperature & sustainability

DVD: The Real Dirt on Farmer John – The epic tale of a maverick Mid-western farmer. An outcast in his community, Farmer John bravely stands amidst a falling economy, vicious rumors, and violence. By melding the traditions of family farming with the power of art and free expression, this powerful story of transformation and renewal heralds a resurrection of farming in America (1 hr & 22 minutes).

LECTURE 3

Soil & Soil Water (Chapters 8 & 9)

- Soil formation & development; soil horizons; soil characteristics; soil nutrients; soil organic matter; soil management; sustainable soil management; diversifying cropping systems
- Movement of water in soil; water availability & plant water uptake; excess water; water deficiency; irrigation ecology; water resource use optimization

LECTURE 4

Humidity, Rainfall, Wind & Fire (Chapters 6, 7 & 10)

- Precipitation & hydrology, rainfed agroecosystems; wet & dry seasons; increased precipitation variability
- Effects of wind & atmospheric movement; modifying wind in agroecosystems
- Fire in natural ecosystems; effects of fire on soil; plant adaptations to fire; fire, fire management & modern agroecosystems

LECTURE 5

Biology & Complexity (Chapters 11, 12 & 13)

- Organisms in the agroecosystems: allelopathy, interactions among organisms
- Organisms affecting crops: parasitism & mutualism, pollinators
- The environment as a complex of factors; interactions of environmental factors; complexity

MODULE 3: SYSTEM LEVEL INTERACTIONS

LECTURE 6

Population Ecology & Genetic Resources in Agroecosystems, Crop Communities (Chapters 14, 15 & 16)

- Principles of population ecology; ecological niche and niche theory in agriculture, population ecology and crops
- Genetic change in nature and genetic diversity; selection & domestication, transgenic modification, consequences in the use of genetic resources; preserving agrobiodiversity; genetics and sustainability
- Interference at the community level; mutual beneficial interferences in agroecosystems; species interactions for sustainability

DVD: The Future of Food -- THE FUTURE OF FOOD offers an in-depth investigation into the disturbing truth behind the unlabeled patented genetically engineered foods that have quietly filled U.S. grocery store shelves for the past decade. From the prairies of Saskatchewan Canada to the fields of Oaxaca Mexico this film gives a voice to farmers whose lives and livelihoods have been negatively impacted by this new technology. The health implications government policies and push towards globalization are all part of the reason why many people are alarmed about the introduction of genetically altered crops into our food supply. Shot on location in the U.S. Canada and Mexico. The Future of Food examines the complex web of market and political forces that are changing what we eat as huge multinational corporations seek to control the world's food system. The film also explores alternatives to large-scale industrial agriculture placing organic and sustainable agriculture as real solutions to the farm crisis today. The Future of Food reveals that there is a revolution going on in the farm fields and on the dinner tables of America a revolution that is transforming the very nature of the food we eat (1 hr & 28 minutes).

LECTURE 7

Agroecosystem Diversity (Chapters 17 & 19)

- Whole-system approach to diversity; ecological diversity; agroecosystem diversity and its benefits; organism colonization and diversity; diversity, resilience & sustainability
- Role of animals in ecosystems; coevolution of livestock animals and agriculture; integrated farming systems; livestock and food system sustainability

LECTURE 8

Agroecosystem Disturbance, Succession & Management (Chapter 18)

- Disturbance & recovery in natural ecosystems
- Disturbanc & recovery application to agroecosystem management
- Agroforestry systems
- Disturbance, recovery and sustainability

MODULE 4: TRANSITION TO SUSTAINABILITY

LECTURE 9

Converting to Ecologically Based Management (Chapters 22 & 23

- Factors & guiding principles for conversion;
- Indicators of sustainability: learning from existing sustainable systems; defining & measuring agricultural sustainability

LECTURE 10

Agriculture, Society & Agroecology (Chapters 24 & 26)

- Narrow view of agriculture; political economy & ecology of food systems
- Broadening the agricultural perspective
- Progress towards sustainability; attaining sustainability; challenges & opportunities

DESCRIPTION OF DVDs

STUDENT CONDUCT AND APPROPRIATE BEHAVIOUR

I encourage students to study together, however each student is expected to individually fulfill the requirements of the assignment, presentation, and exams. It is the responsibility of each student to be aware of what constitutes responsible behaviour in class, what constitutes plagiarism, and your rights and responsibilities with respect to these issues.

INTELLECTUAL PROPERTY:

Students should be aware that this course contains the intellectual property of their instructor, TA, and/or the University of Waterloo. Intellectual property includes items such as:

- Lecture content, spoken and written (and any audio/video recording thereof);
- Lecture handouts, presentations, and other materials prepared for the course (e.g., PowerPoint slides);
- Questions or solution sets from various types of assessments (e.g., assignments, quizzes, tests, final exams); and
- Work protected by copyright (e.g., any work authored by the instructor or TA or used by the instructor or TA with permission of the copyright owner).

Course materials and the intellectual property contained therein, are used to enhance a student's educational experience. However, sharing this intellectual property without the intellectual property owner's permission is a violation of intellectual property rights. For this reason, it is necessary to ask the instructor, TA and/or the University of Waterloo for permission before uploading and sharing the intellectual property of others online (e.g., to an online repository).

Permission from an instructor, TA or the University is also necessary before sharing the intellectual property of others from completed courses with students taking the same/similar courses in subsequent terms/years. In many cases, instructors might be happy to allow distribution of certain materials. However, doing so without expressed permission is considered a violation of intellectual property rights.

Please alert the instructor if you become aware of intellectual property belonging to others (past or present) circulating, either through the student body or online. The intellectual property rights owner deserves to know (and may have already given their consent).

ACADEMIC INTEGRITY:

In order to maintain a culture of academic integrity, members of the University of Waterloo community are expected to promote honesty, trust, fairness, respect and responsibility. The University's guiding principles on academic integrity can be found here: <u>http://uwaterloo.ca/academicintegrity</u>. ENV students are strongly encouraged to review the material provided by the university's Academic Integrity office specifically for students: <u>http://uwaterloo.ca/academicintegrity/Students/index.html</u>

Students are also expected to know what constitutes academic integrity, to avoid committing academic offenses, and to take responsibility for their actions. Students who are unsure whether an action constitutes an offense, or who need help in learning how to avoid offenses (e.g., plagiarism, cheating) or about "rules" for group work/collaboration should seek guidance from the course professor, academic advisor, or the Undergraduate Associate Dean. Students may also complete the following tutorial: https://wwaterloo.ca/library/get-assignment-and-research-help/academic-integrity/academic-integrity-tutorial

When misconduct has been found to have occurred, disciplinary penalties will be imposed under Policy 71 – Student Discipline. For information on categories of offenses and types of penalties, students should refer to Policy 71 - Student Discipline: <u>https://uwaterloo.ca/secretariat-general-counsel/policies-procedures-guidelines/policy-71</u>. Students who believe that they have been wrongfully or unjustly penalized have the right to grieve; refer to Policy #70, Student Grievance:

https://uwaterloo.ca/secretariat-general-counsel/policies-procedures-guidelines/policy-70

STUDENTS WITH DISABILITIES: <u>AccessAbility Services</u>, located in Needles Hall, Room 1401, collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with <u>AccessAbility Services</u> at the beginning of each academic term.

MENTAL HEALTH: The University of Waterloo, the Faculty of Environment and our Departments/Schools consider students' well-being to be extremely important. We recognize that throughout the term students may face health challenges - physical and / or emotional. **Please note that help is available**. Mental health is a serious issue for everyone and can affect your ability to do your best work. Counselling Services http://www.uwaterloo.ca/counselling-services is an inclusive, non-judgmental, and confidential space for anyone to seek support. They offer confidential counselling for a variety of areas including anxiety, stress management, depression, grief, substance use, sexuality, relationship issues, and much more.

RELIGIOUS OBSERVANCES: Students need to inform the instructor at the beginning of term if special accommodation needs to be made for religious observances that are not otherwise accounted for in the scheduling of classes and assignments.

GRIEVANCE: A student who believes that a decision affecting some aspect of his/her university life has been unfair or unreasonable may have grounds for initiating a grievance. See Policy 70 - Student Petitions and Grievances, Section 4, <u>www.adm.uwaterloo.ca/infosec/Policies/policy70.htm</u>. When in doubt please contact your Undergraduate Advisor for details.

APPEALS: A decision made or penalty imposed under Policy 70 - Student Petitions and Grievances (other than a petition) or Policy 71 – (Student Discipline) may be appealed if there is a ground. A student who believes he/she has a ground for an appeal should refer to Policy 72 (Student Appeals) www.adm.uwaterloo.ca/infosec/Policies/policy72.htm

COMMUNICATIONS WITH INSTRUCTOR AND TEACHING ASSISTANTS: All communication with students must be through either the student's University of Waterloo email account or via Learn. If a student emails the instructor or TA from a personal account they will be requested to resend the email using their personal University of Waterloo email account.

TURNITIN: Text matching software (Turnitin®) may be used to screen assignments in this course. Turnitin® is used to verify that all materials and sources in assignments are documented. Students' submissions are stored on a U.S. server, and are subject to the USA PATRIOT ACT, 2001; therefore, students must be given an alternative (e.g., scaffolded assignment or annotated bibliography) if they are concerned about their privacy and/or security. Students will be due notice, in the first week of the term and/or at the time assignment details are provided, about arrangements and alternatives for the use of Turnitin® in this course.

RECORDING LECTURES:

Use of recording devices during lectures is only allowed with explicit permission of the instructor of the course. If allowed, video recordings may only include images of the instructor and not fellow classmates. Posting of videos or links to the video to any website, including but not limited to social media sites such as: facebook, twitter, etc., is strictly prohibited.

CO-OP INTERVIEWS AND CLASS ATTENDANCE: Co-op students are encouraged to try and choose interview time slots that result in the least amount of disruption to class schedules. When this is challenging, or not possible, a student may miss a portion of a class meeting for an interview. Instructors are asked for leniency in these situations; but, a co-op interview does not relieve the student of any requirements associated with that class meeting.

When a co-op interview conflicts with an in-class evaluation mechanism (e.g., test, quiz, presentation, critique), class attendance takes precedence and the onus is on the student to reschedule the interview. CECA provides an interview conflict procedure to manage these situations.

Students will be required to provide copies of their interview schedules (they may be printed from WaterlooWorks) should there be a need to verify class absence due to co-op interviews.
