

FAQs and Setup Tips for Mac Users of FORE

This document is intended for Mac users who experience problems running FORE reports. As Mac specific problems arise and solutions are found, they will be posted here.

1) Problem:

Using FireFox, I can sign in to FORE but when running a report I get the message below just as the report is trying to open:

Solution:

First, make sure there is a PDF viewer installed on your Mac. Next, install the following FireFox plugin to display PDFs in the browser: <https://addons.mozilla.org/en-US/firefox/addon/7518/>

Close FireFox and re-open then re-try the FORE report.
