· **Penetration time of glove material**

For the mixture of chemicals mentioned below the penetration time has to be at least > 180 minutes (Permeation according to EN 374 Part 3: Level 1).

The determined penetration times according to EN 374 part III are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.

Value for the permeation: Level ≤ 1

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· **Eye protection:**

Tightly sealed goggles
