

Government action to promote food system sustainability

Key Recommendations

Dr. Steffanie Scott

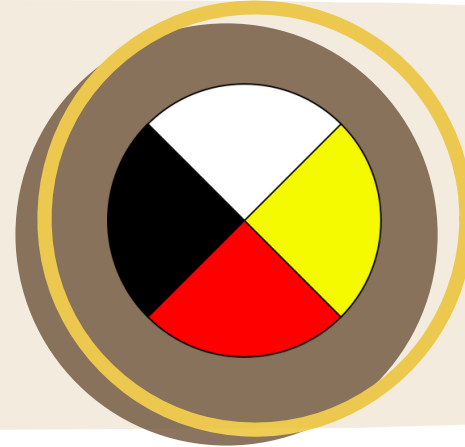

Develop a food strategy_

- Enable discussion and collaboration between multiple stakeholders
- Define priority areas
- Develop an action plan

Indigenous leadership and landback

- Indigenous leaders possess knowledge of living in relationship with the land
- Indigenous leadership will spark a shift from a food system where food is a product, to food as a commons

Promoting a circular economy_

- A circular economy is one which promotes recycling, reusing, and repairing products so they can be used to their full extent
- A circular economy will help reduce food waste

Regenerative agriculture, healthy soils and water

- Provide technical and financial support for regenerative and agroecology practices, and restore degraded ecosystems
- Preserve the countryside and provide farming opportunities in peri-urban and urban environments
- Support home gardeners

Food re-localization and planetary health diet

- Invest in local food infrastructure
- Promote and educate household food preserving
- Promote alternative sources of protein or reduced meat consumption
