

Creating a Better Life Experience with Video Gaming - Dr. Pascaline Lorentz, Visiting Scholar, Masaryk University, Czech Republic

Pascaline will start this presentation by displaying glimpses of her previous research on video gaming. Then, she will explain what her activities in Waterloo were and how they increased her understanding of leisure. This will bridge the past and the future of her research activity. She wants to draw the canvas for her next research project. Indeed, her time spent at the REC department has yielded further research questions that she will address in the near future. Asking for your expertise, sharp eye and critical mindset Pascaline hopes to get the opportunity to improve her first thoughts about her nascent project titled *“Create a Better Life Experience with Video Gaming”*.

Wednesday, March 25, 2015 – 2:00-3:00 pm - LHN 2703
