SHAWN DESOUZA-COELHO

Department: English
Program: MA

Project funded by: The Games Institute and Mitacs

Project co-researchers: Dr. Neil Randall (Faculty Supervisor); Alvin Lee, Computer Science; Jonathan Rodriguez, Computer Science; Kate Phillips, Art (independent)

Places, Please! is a joint venture between The Games Institute at the University of Waterloo and the Stratford Festival of Canada. It is a four-player cooperative mobile game designed to simulate the acts of putting on a theatrical production at the Stratford Festival. Within the framework of these productions, four players take on the roles of each of the four production departments (Acting, Crew, Stage Management, and Tech). All departments must work together to perform simulated versions of the real-life individual and collaborative duties required of them to ensure the smooth running of the show. The game is unique in that the focus is not on these tasks, but on the complex modes of interaction required between departments in their completion.
