

Approval Request for Courses on the Potential Climate Change Elective List

To have a course on the potential climate change elective list approved as a climate change elective option by the MCC Program Director, both the student and the course instructor must confirm their willingness to ensure the course has sufficient climate change focus.

Instructors of these courses often agree to be flexible with major course assignments, research papers, or reports to ensure sufficient climate change content in the course. The student must also agree to ensure that their major course assignment, research paper, or report has a climate change focus

The student completes Section 1 and submits the form via email to the course instructor for approval and obtains a copy of the course outline. Once the form has been approved by the course instructor, the student submits the form to the MCC Program Director via email along with the course outline **and** copies in the MCC Graduate Program Administrator.

Once approved by the MCC Program Director, and received by the MCC Graduate Program Administrator, this document becomes part of the student's record.

SECTION 1:

Term:

Course code:

Name of course:

Course instructor:

Student name:

Student signature:

Date:

SECTION 2 – Instructor Approval:

Instructor signature: _____

Date: _____

SECTION 3 – MCC Program Director Approval:

MCC Program Director signature: _____

Date: _____
