

START

Hooray!

You got vaccinated against Covid-19 today!

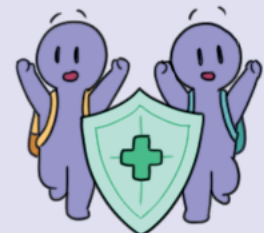

Help your friends get protected by collecting both vaccines ! Remember to avoid the virus !

After the vaccine:

- You might have a sore arm, feel tired, have a headache, or chills. Those things happen because your body is learning to fight Covid-19.
- An ice pack or pain and fever medicine can help.
- Make sure you rest and drink lots of fluids.

You should feel better in a few days!
