ACETAMINOPHEN

is found in **TYLENOL** and **more than 600** over-the-counter products in Canada.

Risk increases with heavy alcohol use.

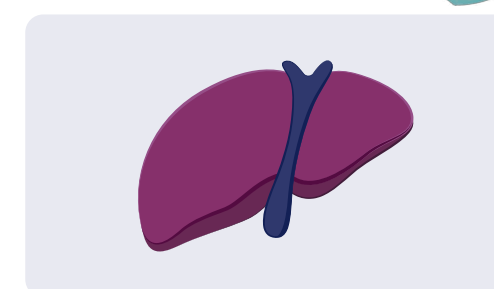

Having more alcohol in your system means you can't take as much acetaminophen.

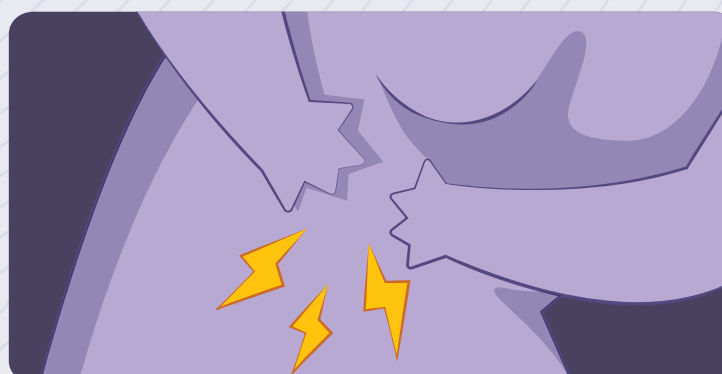

Acetaminophen is also known as paracetamol in other countries like the United Kingdom and Australia.

Many cases of acetaminophen overdose are **accidental.**

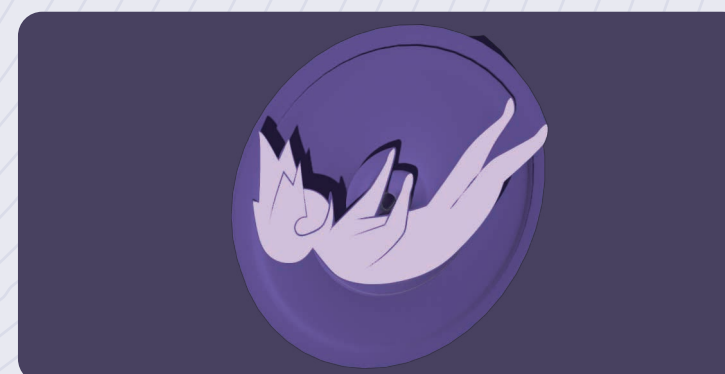

Too much acetaminophen can damage the liver and cause...

VOMITING

ABDOMINAL PAIN

COMA

AND EVEN

DEATH

- ✓ **Read product labels carefully and follow the instructions.**
- ✓ **Keep track of how much you've taken and when.**
- ✓ **Avoid taking more than 1 product containing acetaminophen at the same time.**
