SUSTAINABLE TRAVEL AT HOME

Use these tips to reduce your travel footprint at home.

Plan ahead to compare your options.

Employees have access to the TravelWise platform for trip planning, where you can compare trips by time, distance, cost, emissions, and even calories burned.

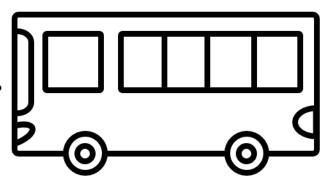

2 Use public transit.

Try taking the bus, ION, or train for longer trips instead of your personal vehicle.

3 Bundle trips.

Set aside time to run multiple errands at once to cut down on trips and save time.

6 Try carsharing.

Borrow from a selection of vehicles only when you need it.

4 Use active transportation.

Try walking, cycling, or another active mode for short trips and errands for the added bonus of boosting physical health!

5 consider an electric vehicle.

Before your next vehicle purchase, consider an electric or hybrid-electric vehicle to save on gas and emissions.

SUSTAINABLE TRAVEL AT HOME

Use these resources to reduce your travel footprint at home.

ACTION	BENEFITS	RESOURCES
Plan ahead to compare your options.	Saves money	 TravelWise UW Employee Network for trip planning, trip logging, and carpool matching
Use active transportation.	 Promotes good health from physical activity Reduces emissions Saves money 	 Region of Waterloo bike lanes Region of Waterloo cycling and walking resources City of Waterloo trails
