IMPORTANT: Please read this information sheet carefully as there are important deadlines mentioned. A copy of this information can be found in the handbook you received in your information package.

An orientation session will be arranged during November and students will be advised of the details. In the meantime, it is recommended you visit Co-Operative Education and familiarize yourself with the website and the Career Development eManual.

Entrance Requirements
Application decisions will be made by the Graduate Affairs Committee after fall term marks are submitted in January. International students can apply, however there are a limited number of spots available for visa students.

Applicants must have obtained at least an 80.0% standing in their graduate course work taken during the fall term. Applicants with incomplete marks on their fall term record as of the first week in January will not be accepted into the co-operative program.

Co-op Requirement
All students accepted in the co-op program will normally complete one or two work terms, from May to August (Spring Term), or May to December (Spring and Fall terms) following their first 2 terms in the MA program. These work terms are administered by the Department of Co-operative Education & Career Services. After the work term(s) students return to finish their MRP/Thesis.

Weekly orientation seminars run by the Department of Co-operative Education & Career Action begin in January. Since admission decisions will not be made until all grades are submitted in January, all applicants are required to attend these seminars. The first seminar will take place during the first week in January. We will notify you when we have the exact dates.

The interviews for MA jobs are part of the undergraduate co-op interviews and take place in February and March.

Each co-op student is required to write a 15-20 page work term report, investigating an aspect of the co-op experience from an academic perspective.

The proposal for this report must be submitted to the Graduate Chair for approval by the end of August (for Summer placements) or December 15, at the end of the second work term.
If you are interested in applying for the co-op program, please fill in the following information and submit the form to the Graduate Coordinator no later than Friday, October 28, 2016. You will be notified about the status of your application during the third week of January.
