Course Description and Objectives

Description

This is an introductory course in psychology, which means that we will be covering all areas of psychology in the course. It is designed to introduce you to the field of psychology as a whole, and to the major theories and findings in the discipline.

2. become familiar with the methods of investigation used in psychology, and the strengths and limitations of these methods;
3. develop an understanding of the vocabulary and concepts of psychology that will allow you to study further in advanced courses or through independent reading; and
4. develop the ability to relate the findings of psychological research to your life and to important issues in our society and the world at large.

This online course was developed by Dr. Steven J. Spencer, with instructional design and multimedia development support provided by the Centre for Extended Learning. Further media production was provided by Instructional Technologies and Multimedia Services.
