FINAL EXAMINATION ARRANGEMENTS AND SCHEDULE

Please carefully review the information about writing exams⧉ for online courses, including dates, locations, how to make examination arrangements, writing with a proctor, and deadlines.

If you are taking **any on-campus courses**, you will automatically be scheduled to write your exam on campus. No action is required.

If you are taking **only online courses, do one of the following**:

- If your **address in QUEST is within 100 km** of an examination centre⧉ , you must choose an exam centre in Quest⧉ by **Sunday, May 13, 2018**. This must be done each term.
- If your address in Quest is **more than 100 km from an exam centre, you must arrange for a proctor**. Please review the guidelines and deadlines for writing with a proctor⧉ . This must be done each term.

Your online course exam schedule will be available in Quest approximately four weeks before your exam date(s). Instructions on how to find your schedule are posted on the Quest Help⧉ page.

University of Waterloo Senate-approved academic regulations related to assignments, tests, and final exams⧉ can be found on the Registrar's website.

OFFICIAL GRADES AND COURSE ACCESS

Official Grades and Academic Standings are available through Quest⧉ .

Your access to this course will continue for the duration of the current term. You will not have access to this course once the next term begins.

ANNOUNCEMENTS

Your instructor uses the Announcements widget on the Course Home page during the term to communicate new or changing information regarding due dates, instructor absence, etc. You are expected to read the announcements on a regular basis.

To ensure you are viewing the complete list of announcements, you may need to click Show All Announcements.

DISCUSSIONS

One challenge of online course work can be the absence of a social network. What if you have questions about course content or need help? How do you get feedback on your understanding of the material? How do you form study groups? There are two discussion boards set up for you to communicate with your classmates to facilitate your success in the course.

The first is a Peer Group Discussion Board. Each student has been assigned to a group with approximately 7 other students. This should be your first stop for eliciting information. In the event that your peer group is unsure of the information (or are unresponsive), there is a second discussion board for communicating with the whole class: Whole Class Discussion Board. Please be generous in your participation on these discussion boards, returning occasionally to read and respond to your classmates. Please note that these are student forums. As such, the instructor and TAs do not typically post or respond to posts on these forums (although we do monitor them).

If you have a question that remains unanswered after visiting the student forums, the next step is to post on the Ask the Instructor board. Responses will usually appear within 24 hours (Mon to Fri). However, before posting on the forum, be sure to check earlier posts in the event that your question has already been answered. I know this all sounds like we are trying to avoid talking to you, but I assure you that is definitely NOT the case. The goal here is to facilitate communication between students and to reduce redundancies in correspondence, which can be overwhelming in online formats.

COURSE DESCRIPTION

Psychology allows us to better understand the human condition by studying behaviour using the scientific method. Psychology 101 will introduce students to the fundamental theories, concepts, methods, and issues encountered in the field of psychology. In addition to learning the core concepts of the field, this course is also meant to instruct the student in the scientific method (as it is used in the social sciences), to give students insight into themselves and their relationships with others, and to develop skills that will help students be successful in university and beyond.

LEARNING OUTCOMES

By the end of the course, you should be able to do the following:

A. Explain and apply the core concepts of psychology. This will provide a foundation of knowledge upon which you can build in upper year psychology courses.
B. Gain an appreciation for the role of science in learning about human behaviour:
    1. Appraise research conducted in psychology.
    2. Participate in psychological research.
C. Gain greater insight into yourself, others, and the human condition:
    1. Apply core concepts to yourself and others.
    2. Recognize and value human diversity.
D. Develop professional skills that will enhance your success in university and beyond:
    1. Recording and organizing information.

2. Implementing strategies for memorization.

3. Asking meaningful questions.

4. Expressing your thoughts with precision and clarity.

COURSE AUTHOR — PAUL WEHR

Teaching Interests

My passion is for undergraduate instruction and support. Trained as a scientist in evolutionary psychology, I have the background and experience to teach a large number of core undergraduate courses including Introductory Psychology, Research Methods, Statistics, Social Psychology, Cultural psychology, and a number of evolutionary themed upper level psychology courses. Presently, my focus is on course development, and the use of student response systems (SRS) in the classroom. Some pedagogical techniques I utilize in addition to SRS include scaffolding assignments, team-teaching, and problem-focused instruction.

© University of Waterloo

In terms of student support, I focus on skills training and undergraduate advising. In addition to an official advising role within the Psychology Department, I consult on a variety of topics — such as note taking, exam prep, library research, and scientific writing — that help students to adapt and succeed in university and beyond. I encourage student-instructor interaction by making myself more accessible to students during extended weekly office hours.
