Email:	jrempel@uwaterloo.ca	Email:	kcjmoore@artsmail.uwaterloo.ca
Office Hours:	10:00 – 11:00 Mondays, Wednesdays	Office Hours:	10:30 – 11:30 Mondays, Wednesdays

Class Meets: STJ 1036, Monday and Wednesday, 11:30 – 12:50.

Textbook: Hyde, J. S., DeLamater, J. D., & Byers, S. E. (2006). *Understanding Human Sexuality* (3rd Canadian Edition). USA: McGraw-Hill Ryerson Limited.

Course Objectives and Content:

This course is designed to provide students with basic information and a working vocabulary about human sexuality from a psychological perspective. Since human sexuality is, by its very nature, a topic that must be considered from a variety of disciplinary perspectives, information from biological, anthropological, sociological, and philosophical sources will also be considered and analyzed. The course will be presented in a teaching environment that encourages students to reflect on the course material and connect it to their own life experiences. Classes will consist of lectures, audio-visual presentations, group discussions and (possibly) guest speakers.

Requirements and Evaluation:

There are two grading options. First, you may base your course grade entirely on your performance on four regular term multiple choice tests. Each test counts for 25% of your final grade (*Test 1: January 22; Test 2: February 12; Test 3: March 12; Test 4: April 2*). In general, the four term tests will be based equally on lecture and textbook material, and will primarily include material covered after the previous test. All tests will make use of scannable computer cards, so please bring a pencil and an eraser.

The mark received for a test stands – it will not be dropped, re-weighted, etc. because you weren't feeling well, had a lot on your mind, etc., nor will "extra" assignments given to students who are dissatisfied with their grades. My goal is to be fair to everyone – please don't ask for special treatment. However, it is fair for a test to be rescheduled for *legitimate* medical, compassionate, or religious grounds. Unless circumstances make it impossible to do so, please inform us PRIOR to the scheduled test to arrange a timely makeup, and to provide acceptable documentation to support a medical, compassionate, or religious claim (Page 1:8-9 in the University of Waterloo Calendar). Make-up exams may differ in format from the original.

Test results will be posted on the Psychology bulletin board between offices 2016 and 2018. Be assured that we will post them as soon as they are available. Please check your mark after each test, as we do not generally release marks over the phone or by e-mail, and university policy prohibits final grades from being posted prior to the end of the examination period.

As a second grading option you may base a portion of your grade on a research paper. With this option you are still required to write the four term tests. However, each test will be worth 17% of your final grade and the remaining third of your grade (32%) will be based on a research paper written on a topic of your choice related to psychology and sexuality. The paper is due on Wednesday, April 4. You may choose to write the paper at any time prior to the due date, but once you have handed it in, you will be graded according to the second grading option.

For this paper you are required to focus on a very narrow, specific topic within the empirical research literature (i.e. journal articles that present original data). You can get ideas for a topic by scanning the research literature (e.g. using PsycINFO or looking through the journals directly), but you must discuss the topic with me prior to writing the paper. This topic should be narrow enough such that there are only 2 to 4 empirical articles (original academic journal articles in which data is collected and analyzed) dealing with your specific topic. Keep narrowing down your topic until ALL of the available empirical articles on your topic number between 2 and 4. For your paper you are required to write a brief introduction to your topic, summarize the articles (approximately one article per page), and then write a one page integrative analysis and conclusion in which you should describe the state of knowledge on this topic and identify a future research direction.

Special Needs

Students with documented or suspected disabilities (i.e., physical, learning, or sensory disabilities or chronic medical conditions) are encouraged to contact the Office for Persons with Disabilities (OPD) to determine eligibility for their services. OPD is located in Needles Hall Room 1132 and can be contacted at 519-888-4567 ext. 35082, TDD/TTY 888-4044. In the event that you require an adapted learning or testing environment, please provide us with OPD documentation *at the beginning of the term*.

Course Schedule:

Date	Topic	Chapters
Jan 3	Introduction	
8	theoretical Perspectives	2
10, 15	empirical Issues in the Study of human sexuality	3
17	biological aspects of human sexuality	5
22	*** Test 1 ***	
24, 29	sexuality through the life cycle	11
31	sexuality and aging	12
Feb. 5, 7	sexuality and relationships	10
12	*** Test 2 ***	
14	sexuality and relationships	13
19, 21	*** Study Week - no class ***	
26	extra-relational sexuality	
28	sex and gender	14
Mar. 5	sexual orientation	15
7	atypical sexual variations	16
12	*** Test 3 ***	
14, 19	sexual coercion and abuse	17
21, 26	sexuality and pornography	18
28	sexual dysfunction and therapeutic intervention	19
Apr. 2	*** Test 4 ***	
4	*** optional papers due ***	

Academic Offenses:

A word about cheating – don't. It is lazy, disrespectful, and immoral. People who cheat or plagiarize are incompetent – they haven't learned the material, and they are untrustworthy – they are willing to mislead others and taken advantage of their fellow students in order to get ahead. I do not want incompetent, immoral people getting a university degree, much less a job in a position of responsibility. Therefore, I won't have a lot of sympathy if I find that you have tried to abuse the rules for your own benefit. Here's the official statement: "All students registered in the courses of the Faculty of Arts and its University colleges are expected to know what constitutes an academic offense, to avoid committing academic offenses, and to take responsibility for their academic actions. When the commission of an offense is established, disciplinary penalties will be imposed in accord with Policy #71 (Student Academic Discipline) which is supplied in the University of Waterloo Undergraduate Calendar (p. 1:10) and St. Jerome's University Calendar (pp. 16 – 17) [or on-line at <http://www.adm.uwaterloo.ca/infosec/Policies/policy71.pdf>]. If you believe you have been wrongfully or unjustly penalized, you may grieve this decision in accord with Policy #70, (Student Grievance, p. 17–18 SJU Calendar). If you need help in learning how to avoid offenses such as plagiarism, cheating and double submission, or if you need clarification of aspects of the discipline policy, ask your course instructor for guidance. Other resources regarding the discipline policy are your academic advisor, the appropriate St. Jerome's departmental chair and ultimately the Appeals Officer (currently the Associate Dean) for St. Jerome's University."

On Doing Your Best

As an alternative to cheating there are some things that you can do to put in the best performance possible in this class. First, come to class! Be alert. Do more than mindlessly write down whatever appears on an overhead: *Think* about the material – try to come up with your own examples and illustrations by applying the material to the things you already know. Don't simply assume that it's easy or common sense – often, it is not. (A good test of your own understanding of concepts is whether you can explain them to others.)

Second, do the readings! Ideally, read them at least once before the relevant lecture, and at least once after that lecture. Don't mindlessly run a highlighter over the words: *Think* about the material – write down questions, observations, possible examples, etc. as you read.

Third, look for connections! I will be dealing with a lot of specific phenomena in this class, but there will be some big themes that will keep recurring throughout the term. Look for them. Look also for connections between lecture and assigned readings. Think about what *this* theorist might say about *that* topic, etc. – even if it is never addressed in class.

You should be detecting a common theme in my suggestions. I try to create test questions that are conceptual and applied. It isn't good enough to memorize the material – you need to take the time to think about it and make the effort to really understand it.
