

LANGUAGE DEVELOPMENT
Fall 2012
PSYCH 320
Time: Tuesday/Thursday 10:00-11:20
Location: PAS 2083

INSTRUCTOR

Dr. Katherine White
Office: PAS 4014
Email: white@uwaterloo.ca
Office Hours: Thursday 2:30-4

TEACHING ASSISTANTS

Julia Van de Vondervoort
Office: PAS 4017
Email: jwvandev@uwaterloo.ca
Office Hours: Tuesday 9-10

Drew Weatherhead
Office: PAS 4016
Email: deweathe@uwaterloo.ca
Office Hours: Friday 10-11

COURSE DESCRIPTION

Human language is an incredibly complex system. Yet in the space of a few short years, infants become full members of the language community. How do we acquire a system of such incredible complexity, and in such a short period of time? In this class, we will consider the steps typically developing children take along the path to learning language, including how they learn about sounds, words, higher-level sentence structure, and how to communicate effectively. We will explore factors within the child and his/her environment that make this remarkable feat possible. We will also consider special populations of learners who can provide additional insight into the acquisition process. In addition to presenting important issues in the field of language development, the course aims to introduce students to the variety of methods that have been used to address these issues.

TEXTBOOK

Hoff, E. (2009). *Language Development* (4th edition). Belmont, CA: Wadsworth.

Given the size of the course, the format will be primarily lecture-based. Lectures will cover material from the textbook, as well as from assigned primary source articles. PDFs of these (required) readings will be available on the course website through LEARN.

COURSE WEBSITE

The syllabus, lectures, assigned readings, and assignments will be available on the LEARN course website. Lectures will be posted to the course website no later than an hour before class. Announcements will be posted to LEARN or communicated over email. Please check both LEARN and UW email regularly.

The Official Version of the Course Outline

If there is a discrepancy between the hard copy outline and the outline posted on LEARN, the outline on LEARN will be deemed the official version. Outlines on LEARN may change as instructors develop a course, but they become final as of the first class meeting for the term.

COURSE REQUIREMENTS

Exams

There will be three non-cumulative in-class exams, as well as an optional final exam during exam period. Each in-class exam will cover material from 1/3 of the course. The exams will be a combination of multiple choice, fill-in-the-blank, and short answer questions. They will cover in-class lectures, as well as textbook and primary source readings, and other supplemental material, such as videos. The optional final can be used in place of the lowest scoring test during the semester. The optional final will be cumulative and longer than the tests during the semester.

Assignments

There will be three homework assignments (worth 7 points each) and two in-class worksheets (worth 1 point each). The goal of these assignments is to give students more exposure to primary source literature and child language data. Assignments are due at the beginning of class on the assigned date. Assignments submitted after the start of class, but within the same day, will receive a 1-point deduction from the total score. Assignments submitted after the due date will receive a zero, except in the case of personal illness or family emergency (see below). Two versions of each assignment are required: a typed hard copy should be submitted in class. Additionally, an electronic version should be submitted before the start of class through the LEARN website.

Grading

<i>Item</i>	<i>% of final grade</i>
Midterm 1	25%
Midterm 2	25%
Midterm 3	25%
Assignments/in class worksheets	23%
Research participation/article summaries	2%

UW POLICY ON MISSED ASSIGNMENTS AND TESTS

Students are entitled to a rescheduling of tests or an extension of deadlines for legitimate medical reasons. It is your responsibility to inform the instructor of your illness and provide documentation in a timely manner. If there is undue delay, the instructor reserves the right to refuse an extension or makeup. The timing of the extension or makeup will be at the discretion of the instructor.

Students who are requesting accommodation for course requirements (assignments, midterm tests, final exams, etc.) due to illness should do the following:

*(Preferably) inform the instructor **by the due date** for the course requirement that you will be unable to meet the deadline and that documentation will be forthcoming

*Seek medical treatment as soon as possible and obtain a completed UW Verification of Illness Form: http://www.healthservices.uwaterloo.ca/Health_Services/verification.html. Please be aware that a note on a prescription pad is not an acceptable medical certificate.

*Submit the UW Verification of Illness Form to the instructor within 48 hours of the due date

In the case of a missed assignment deadline or midterm test, the instructor will either:

*Waive the course component and re-weight remaining term work as she deems fit according to circumstances and the goals of the course OR *Provide an extension

In the case of a missed final exam, the instructor and student will negotiate an extension for the final exam which will typically be written as soon as possible, but no later than the next offering of the course.

In the case of bereavement, the instructor will provide similar accommodations to those for illness. Appropriate documentation to support the request will be required.

If you miss an assignment deadline or test for a reason other than serious personal illness or family emergency (documentation required in both cases), you will not be granted an extension or be permitted to take a make-up test.

Students who are experiencing extenuating circumstances should inform their academic advisors regarding their personal difficulties. If you feel that you have a medical or personal problem that is interfering with your work, you should contact your instructor and Counseling Services as soon as possible. Problems may then be documented and possible arrangements to assist you can be discussed at the time of occurrence rather than on a retroactive basis.

Accommodation for Students with Disabilities:

Note for students with disabilities:

The Office for Persons with Disabilities (OPD), located in Needles Hall, Room 1132, collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with the OPD at the beginning of each academic term.

COMPLAINTS, ACADEMIC INTEGRITY, ACADEMIC OFFENSES

Concerns about the Course or Instructor (Informal Stage)

We in the Psychology Department take great pride in the high quality of our program and our instructors. Though infrequent, we know that students occasionally find themselves in situations of conflict with their instructors over course policies or grade assessments. If such a conflict arises, the Associate Chair for Undergraduate Affairs (Dr. Myra Fernandes) is available for consultation and to mediate a resolution between the student and the instructor. The contact information for Dr. Fernandes is as follows:

Email: mafernan@uwaterloo.ca Ph 519-888-4567 ext 32142

Academic Integrity:

Academic Integrity: In order to maintain a culture of academic integrity, members of the University of Waterloo are expected to promote honesty, trust, fairness, respect and responsibility.

Discipline: A student is expected to know what constitutes academic integrity, to avoid committing academic offences, and to take responsibility for his/her actions. A student who is unsure whether an action constitutes an offence, or who needs help in learning how to avoid offences (e.g., plagiarism, cheating) or about “rules” for group work/collaboration should seek guidance from the course professor, academic advisor, or the Undergraduate Associate Dean. When misconduct has been found to have occurred, disciplinary penalties will be imposed under Policy 71 – Student Discipline. For information on categories of offenses and types of penalties, students should refer to Policy 71 - Student Discipline,

<http://www.adm.uwaterloo.ca/infosec/Policies/policy71.htm>.

Grievance: A student who believes that a decision affecting some aspect of his/her university life has been unfair or unreasonable may have grounds for initiating a grievance. Read Policy 70 - Student Petitions and Grievances, Section 4,

<http://www.adm.uwaterloo.ca/infosec/Policies/policy70.htm>.

Appeals: A student may appeal the finding and/or penalty in a decision made under Policy 70 - Student Petitions and Grievances (other than regarding a petition) or Policy 71 - Student Discipline if a ground for an appeal can be established. Read Policy 72 - Student Appeals,

<http://www.adm.uwaterloo.ca/infosec/Policies/policy72.htm>.

Research Experience Marks Information and Guidelines

Experiential learning is considered an integral part of the undergraduate program in Psychology. Research participation is one example of this, article review is another. A number of undergraduate courses have been expanded to include opportunities for Psychology students to earn grades while gaining research experience.

Since experiential learning is highly valued in the Department of Psychology, students may earn up to 2% of their final mark in this course through research experience (i.e., course work will make up 98% of the final mark and research experience will make up the other 2% for a maximum grade of 100%). **However there are some restrictions on the types of studies that are eligible for credit in this course. Be sure to review the guidelines referred to later in this document.**

The two options for earning research experience grades (participation in research and article review) are described below. Students may complete any combination of these options to earn research experience grades.

Option 1: Participation in Psychology Research

Research participation is coordinated by the Research Experiences Group (REG). Psychology students may volunteer as research participants in lab and/or online (web-based) studies conducted by students and faculty in the Department of Psychology. Participation enables students to learn first-hand about psychology research and related concepts. Many students report that participation in research is both an educational and interesting experience. Please be assured that all Psychology studies have undergone prior ethics review and clearance through the Office of Research Ethics.

Educational focus of participation in research

To maximize the educational benefits of participating in research, students will receive feedback information following their participation in each study detailing the following elements:

- Purpose or objectives of the study
- Dependent and independent variables
- Expected results
- References for at least two related research articles
- Provisions to ensure confidentiality of data
- Contact information of the researcher should the student have further questions about the study

- Contact information for the Director of the Office of Research Ethics should the student wish to learn more about the general ethical issues surrounding research with human participants, or specific questions or concerns about the study in which s/he participated.

Participation in LAB studies is worth 0.5 participation credits (grade percentage points) for each 30-minutes of participation. Participation in ONLINE studies is worth .25 credits for each 15-minutes of participation. Researchers will record student's participation and will advise the course instructor of the total credits earned by each student at the end of the term.

How to participate?

Study scheduling, participation and grade assignment is managed using the SONA online system. All students enrolled in this course have been set up with a SONA account. You must get started early in the term.

[INSTRUCTIONS/DATES/DEADLINES: How to log in to Sona and sign up for studies](#)

**** Please do not ask the Course Instructor or REG Coordinator for information unless you have first thoroughly read the information provided on this website.****

More information about the REG program in general is available at:
[REG Participants' Homepage](#)

Option 2: Article Review as an alternative to participation in research

Students are not required to participate in research, and not all students wish to do so. As an alternative, students may opt to gain research experience by writing short reviews (1½ to 2 pages) of research articles relevant to the course. The course instructor will make available a set of articles that can be summarized for research credit in this course. Each review article counts as one percentage point. To receive credit, you must follow specific guidelines. The article review must:

- **Be submitted before the [last day of lectures](#). Late submissions will NOT be accepted under ANY circumstances.**
- Be typed
- Fully identify the title, author(s), source and date of the article.
- Identify the psychological concepts in the article and indicate the pages in the textbook that are applicable. Critically evaluate the application or treatment of those concepts in the article. If inappropriate or incorrect, identify the error and its implications for the validity of the article. You may find, for example, misleading headings, faulty research procedures, alternative explanations that are ignored, failures to distinguish factual findings from opinions, faulty statements of cause-effect relations, errors in reasoning, etc. Provide examples whenever possible.
- Clearly evaluate the application or treatment of those concepts in the article.
- Keep a copy of your review in the unlikely event we misplace the original.
