Psych 455: Honours Psychology Seminar: Close Relationships

Wednesdays 9:30-12:20; Fall Term 2011; Room STJ 3020

Contact Information

Instructor: Dr. John K. Rempel Office: St. Jerome's College Rm. 2018 Phone: 884-8111 ext. 28212 Email: jrempel@uwaterloo.ca

Office Hours: by appointment

Course Objectives

The goal in this seminar is to examine some current theories and research in the social psychological study of close relationships. An equally important goal is to encourage independent thinking and critical analysis. I want to provide you with tools that you can use to effectively gather and evaluate information for yourselves. Finally, I strongly believe that it is vital for students to develop effective oral and written communication skills. Regardless of people's future goals and aspirations, everyone can benefit from learning how to present ideas and information in a clear, focused, and precise manner.

Course Content and Evaluation

In order to achieve the course objectives, I have designed the course around a series of broad conceptual topics and ideas that are central to the psychological study of close relationships.

Group Discussions: For the first six classes (*in italics*) I will be leading the discussion. It is your responsibility to read the assigned articles and be prepared to contribute your observations and ideas.

Article Presentations: In each of these first six classes there will be one or two articles that everyone is expected to read for class. In addition at the beginning of each class students will present four additional articles, with each presentation taking no more than 15 minutes. Presentations will be graded (15%).

Class Participation: Given the nature of the course, you are obviously expected to be present and involved in each class. Thus 10% of your grade will be based on your attendance and participation. Exceptions will be made for legitimate reasons (e.g. illness, religious observance, compassionate grounds, etc.) and if you cannot attend a class please let me know ahead of time if possible. Simply attending class without contributing to the discussion is the minimal expectation and it will get you a minimal C-level passing grade. Obtaining a higher participation grade will require a higher level of participation.

Class Presentation: In later classes (**in bold**), students will work in groups of five to develop and lead a class session using the following procedures.

- 1. I have listed a series of general topics below. You will need to choose a topic and narrow it by selecting a more specific set of issues to focus on. You can do this by conducting a literature search and scanning recent abstracts and/or you can ask me for suggestions.
- 2. Once you have identified some specific topics, you should run them by me in a short meeting. Together we will zero in on a specific topic and I can offer some suggestions for specific authors or additional articles that you can look up.
- 3. Your next task is to find one or two longer or two to three shorter key articles that will be read by the class. These articles should be sent to me at least one week before you are to lead the class and I will post them.
- 4. When you lead the class you need to realize that you will have developed expertise on your topic. In order to convey this knowledge and encourage the development of further ideas, you should do the following.

First, you should provide a general overview and introduction of the topic that is being discussed. Clearly you will have read more than your fellow classmates and you should be able to set your specific topic into a broader context. For example, if you are dealing with an aspect of conflict you should provide a brief overview of major issues in the conflict literature and indicate how your specific topic fits into that literature.

Second, you are expected to give a more detailed overview of the specific theoretical issues or research studies that you are dealing with. You will likely present the results of additional studies that your fellow students will not have read. These will need to be brief and to the point.

Third, and most importantly, you are expected to generate a meaningful discussion and critical analysis of the topics being discussed. Therefore, you will need to raise provocative and stimulating questions. These questions may occur during your presentation or you may want to ask them at the end. Whatever your procedure, you will need to be prepared to lead the discussion and move people's thinking along.

Finally, you will need to provide a conclusion or summation of the ideas presented in class. This conclusion should include concrete suggestions for directions for future research. Be sure to explain why this research should be done and what you would hope to learn.

- 5. I welcome creativity in your presentation. For example, you can use small group discussions, role-plays, music or video clips, questionnaires, etc. to get people thinking, generate a discussion, or make a point. It is also a good idea to prepare a bibliography for the class.
- 6. This whole process, from choosing a topic and articles to leading the class, will be graded. It is worth 35% of your grade. I will make the final decision on a grade, but the class will have input into the evaluation of your class presentation. Unless there are good reasons to do otherwise, each person in the group will receive the same grade but each of you will provide a short confidential assessment of your fellow group members.

Research Proposal: The third major assignment in this course is a written research proposal. This proposal may be based on the material in your presentation or you can choose a different topic. Basically you will be writing the introduction and methods

sections of an empirical journal article (*not* the results or discussion sections). This need not be a long paper. Introductions are anywhere from 7 to 12 typed pages (double spaced Times New Roman 12-point font with 1-inch margins) and methods sections vary according to the complexity of the measures and procedures. However, this paper will require you to be thoughtful and creative in approaching the challenges of conducting research on close relationships.

This proposal can be completed individually or in groups of 2 or 3 and is comprised of three stages. Stage 1: By the first week of February I expect you to have met with me to finalize a research idea. Stage 2: I expect an initial draft of your proposal to be handed in on February 26. This version of your paper will be graded and is worth 10% of your final grade so you should be focused on providing me with a high quality draft. I will give you feedback on organization and readability of your paper. Stage 3: The final version of your paper is due after classes finish, and is worth 30% of your grade. My expectations and standards for the final version will be higher than what I expected of the first draft so it will be worth your while to do a good job editing your paper.

Late Assignments and Academic Offenses:

Unless other arrangements have been made, I will deduct 5% per day for late assignments. In addition, I wish to remind you that plagiarism and other forms of cheating are very bad. Here is an official statement:

Academic Integrity: In order to maintain a culture of academic integrity, members of the University of Waterloo and its Federated University and Affiliated Colleges are expected to promote honesty, trust, fairness, respect and responsibility. Discipline: All students registered in courses at St. Jerome's University are expected to know what constitutes academic integrity, to avoid committing academic offences, and to take responsibility for their actions. A student who is unsure whether an action constitutes an offence, or who needs help in learning how to avoid offences (e.g., plagiarism, cheating) or about "rules" for group work/collaboration should seek guidance from the course professor, academic advisor, or the Associate Dean. When misconduct has been found to have occurred, disciplinary penalties will be imposed under St. Jerome's University Academic Discipline Policy and UW Policy 71 – Student Discipline. For information on categories of offenses and types of penalties, students should refer to Policy 71 - Student Discipline, www.adm.uwaterloo.ca/infosec/Policies/policy71.htm. Grievance: A student who believes that a decision affecting some aspect of his/her university life has been unfair or unreasonable may have grounds for initiating a grievance. In such a case, contact the St. Jerome's University Grievance Officer. Read St. Jerome's University Handbook, Section 4, item 8, www.siju.ca/faculty staff/SJU handbook/grievance policy.html. Appeals: A student may appeal the finding and/or penalty in a decision made under St. Jerome's University Academic Discipline Policy or Grievance Policy if a ground for an appeal can be established. In such a case, contact the St. Jerome's University Appeals Officer. Read St. Jerome's University Handbook, Section 6.4,

www.sju.ca/faculty/SJU handbook/examinations grades standings and appeals.html.

Academic Integrity website (Arts): http://arts.uwaterloo.ca/arts/ugrad/academic responsibility.html Academic Integrity Office (UW): http://uwaterloo.ca/academicintegrity/

Note for students with disabilities: The Office for Persons with Disabilities (OPD), located in Needles Hall, Room 1132, collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with the OPD at the beginning of each academic term.

Schedule:

<u>Date</u>		<u>Topic</u>
January	7	introduction and organization
	14	adult attachment
	21	self-esteem
	28	self theory and close relationships
February	4	trust and power
_	11	love (and hate)
	25	commitment
March	4	attraction and partner selection
	11	communication, disclosure, and intimacy
	18	conflict
	25	relationship dissolution
April	1	relationship maintenance and success
•	8	*** research proposal due ***
