PMath 450/650 Lebesgue Measure and Fourier Analysis T R : 13:00 - 14:20 MC 4058

Instructor: L.W. Marcoux

Basic Outline:

- Vector-valued Riemann integration
- Lebesgue measure
- Lebesgue integration
- L^p spaces
- Hilbert spaces
- Fourier analysis

Exams: There will be one midterm examination and one final examination. Once the times and the locations of these exams is known, that information will be posted to the LEARN website.

Grading: You will receive the maximum of the grades determined by the following two schemes:

- Assignments: 25%, Midterm: 30%, Final: 45%;
- Assignments: 25%, Midterm: 20%, Final: 55%.

Comments:

- 1. There will be *approximately* 8 assignments, handed out on an (almost) weekly basis. All but your worst assignment will count towards your assignment grade.
- 2. Solutions will be posted on the above webpage *immediately* after the due date. Because of this, **late** homework assignments will not be accepted.
- 3. Assignments will be handed in using Crowdmark.
- 4. Getting *a bit* of help with assignments is OK, but copying an assignment (or even just one question from an assignment) or an exam constitutes *cheating*. *I do not deal with cheating issues at all*. If I am presented with two assignment or exam solutions that look eerily similar, or if a solution looks suspiciously like an answer found in a book/on the web, or if I find evidence of any suspicious activity, then I *automatically* forward the information to the Integrity Officer. Simply put, if you want/feel the need to cheat to improve your grade, then this is the wrong course for you.

The only way to learn mathematics is to do mathematics. The more assignment questions you can answer on your own, the more you will learn, and the easier the exams will seem.

Course Outline May 2019

 $\rm MC~5014$

• Academic Integrity: In order to maintain a culture of academic integrity, members of the University of Waterloo community are expected to promote honesty, trust, fairness, respect and responsibility.

[Check www.uwaterloo.ca/academicintegrity/ for more information.]

• Grievance: A student who believes that a decision affecting some aspect of his/her university life has been unfair or unreasonable may have grounds for initiating a grievance. Read Policy 70, Student Petitions and Grievances, Section 4,

http://www.adm.uwaterloo.ca/infosec/Policies/policy70.htm.

When in doubt please be certain to contact the department's administrative assistant who will provide further assistance.

• **Discipline**: A student is expected to know what constitutes academic integrity to avoid committing academic offenses and to take responsibility for his/her actions. A student who is unsure whether an action constitutes an offense, or who needs help in learning how to avoid offenses (e.g., plagiarism, cheating) or about "rules" for group work/collaboration should seek guidance from the course professor, academic advisor, or the undergraduate associate dean. For information on categories of offenses and types of penalties, students should refer to Policy 71, Student Discipline,

http://www.adm.uwaterloo.ca/infosec/Policies/policy71.htm.

For typical penalties check Guidelines for the Assessment of Penalties,

http://www.adm.uwaterloo.ca/infosec/guidelines/penaltyguidelines.htm.

• Appeals: A decision made or penalty imposed under Policy 70, Student Petitions and Grievances (other than a petition) or Policy 71, Student Discipline may be appealed if there is a ground. A student who believes he/she has a ground for an appeal should refer to Policy 72, Student Appeals,

http://www.adm.uwaterloo.ca/infosec/Policies/policy72.htm.

• Note for students with disabilities: Access Ability Services, located in Needles Hall, Room 1132, collaborates with all academic departments to arrange appropriate accommodations for students with disabilities without compromising the academic integrity of the curriculum. If you require academic accommodations to lessen the impact of your disability, please register with the Access Ability Services at the beginning of each academic term.
